Foreword

The Summary Statistics report describes police services and crime trends in British Columbia. It is published every year by the Ministry of Public Safety and Solicitor General. This edition covers the ten-year period from 1996 to 2005, with an emphasis on 2005.

The report summarizes the structure of policing, the type and incidence of criminal activity, the number and distribution of police personnel throughout the province, and the cost of police services. The appendices contain detailed data for individual policing jurisdictions, as well as for the province.

There may be some variance in the data and statistics in this edition of the Summary Statistics report in comparison to previous editions. Where this occurs, the latest edition will reflect the most current data.

More information on police statistics for British Columbia can be obtained from:

Policing and Crime Data Collection in British Columbia

Overview of Policing in British Columbia 13

British Columbia Policing Jurisdictions 17

Overview of Crime Data Collection in British Columbia 23

Overview of Policing in British Columbia

Residents of British Columbia receive police services from an RCMP provincial force, 59 RCMP municipal forces, 11 independent municipal forces and two First Nations forces (FNAPS). In addition, the RCMP federal force, the Combined Forces Special Enforcement Unit (formerly known as the Organized Crime Agency of British Columbia), and the Canadian National and Canadian Pacific railway police forces also provide law enforcement within the province. In the Lower Mainland area of the province, the Greater Vancouver Transportation Authority Police Service (GVTAPS) was established as a designated police unit under the Police Act in late 2005. There are also enhanced policing services at the Vancouver International Airport.

Municipalities with a population exceeding 5,000 persons are responsible for providing police services within their boundaries. These municipalities may contract with the RCMP to provide municipal policing or they may form an independent (non-RCMP) municipal force. The RCMP provincial force polices municipalities with a population below 5,000 persons, as well as unincorporated (usually rural) areas.

Provincial and municipal RCMP detachments provide police services to specific geographic locations within the province as do the independent municipal forces and the First Nations forces. A municipal, a provincial or a First Nations force polices each area in the province. A complete list of municipal, provincial and First Nations policing jurisdictions is provided at the end of this section.

RCMP Provincial Force

The RCMP provincial force serves unincorporated areas as well as 86 municipalities with populations below 5,000 persons. In 2005, the provincial force had an authorized strength of 2,047 officers providing police services to a population of 720,443 persons.

The cost of the provincial force is shared between the federal and provincial governments under the terms of the Provincial Police Services Agreement. The province pays 70% of the contract costs while the federal government pays the remaining 30%. Municipalities with a population of less than 5,000 do not make a direct contribution toward the provincial police services they receive. Rural property owners pay a rural property tax, but the amount raised from this tax does not make a significant contribution to policing.

The RCMP provincial force detachments are usually named after the municipalities in which the detachment offices are located. For example, the Princeton RCMP provincial unit polices not only the Town of Princeton but also the rural areas and other communities contained within the detachment's boundaries.

The RCMP provincial force is also responsible for policing unincorporated areas surrounding municipalities that have populations exceeding 5,000 persons. For example, the Nanaimo RCMP provincial unit is only responsible for policing areas outside the municipal boundaries of the City of Nanaimo since the City is served by a municipal RCMP force.

Where both municipal and provincial units are located in the same detachment, the RCMP members from each unit report to one commanding officer and provide police services to the combined provincial and municipal policing areas.

Municipal Police Forces

Under the Police Act a municipality must assume responsibility for its police services when, as a result of a Canada Census, its population reaches 5,000 persons. In 1996, there were 67 municipalities with populations exceeding 5,000 persons. This number increased to 71 in 1997 following the release of the 1996 Canada Census results, and remained at 71 following the release of the 2001 Canada Census results.

As previously mentioned, these municipalities may form their own independent police forces or contract with the RCMP for municipal policing services. In 2005, 12 municipalities have their own police departments, while 59 contract with the RCMP for municipal police services.

Independent Municipal Forces

Twelve municipalities in British Columbia have formed their own police departments. These twelve municipalities are policed by 11 independent municipal police departments. Following the amalgamation of the Victoria and Esquimalt police departments in 2003, these two municipalities are policed by one independent force, the Victoria Police Department.

The 11 police departments are referred to as independent municipal police forces, as each of the municipalities is responsible for 100% of its policing costs. The independent municipal forces include Vancouver, Victoria, Saanich, Central Saanich, Oak Bay, Delta, Abbotsford, New Westminster, West Vancouver, Nelson and Port Moody.

RCMP Municipal Forces

In 2005, there were 59 municipalities with RCMP municipal police services. Each of these municipalities has signed a Municipal Police Unit Agreement with the federal and provincial governments for the provision of RCMP police services to the area within their municipal boundaries. Under this agreement (contract), the cost of policing these municipalities is shared between the municipality and the federal government.

There are two different cost-sharing formulas. Municipalities with populations exceeding 15,000 persons are responsible for 90% of the cost of their RCMP police services. Municipalities with populations between 5,000 and 15,000 persons are responsible for 70% of the cost of their RCMP police services. The federal government pays the remaining 10% and 30% respectively. However, municipalities with RCMP agreements pay 100% of their accommodation and support staff.

Chronology of New RCMP Municipal Forces (1986-2002)

During the 1980s, eight B.C. municipalities exceeded 5,000 population and became responsible for their police services. Rather than establish their own police departments, or contract for municipal police services, it was agreed that the province, through the RCMP provincial force, would extend police services to these municipalities on a fee-for-service basis. In 1992, seven of these "extended" municipalities - Revelstoke, Coldstream, Pitt Meadows, Colwood, North Saanich, Parksville (Oceanside) and Port Hardy - converted to RCMP municipal contracts. The eighth municipality, Fernie, converted in 1994.

The results of the 1991 Canada Census revealed that the population of three municipalities - Sechelt, View Royal and Smithers - had exceeded 5,000 persons. Consequently, these municipalities became responsible for their police services in 1992. Two of the municipalities signed RCMP municipal contracts in 1992 and the third, Smithers, signed a municipal contract in 1994.

In 1993, Qualicum Beach expanded its municipal boundaries and its subsequent population exceeded 5,000 persons. Qualicum Beach entered into a contract for RCMP municipal police services during that year.

In 1994, Langford became incorporated as a municipality with a population exceeding 5,000 and signed a RCMP municipal police services contract.

Overall, between 1992 (when seven of eight extended contracts were converted to municipal contracts) and 1994 (when an eighth extended contract was converted and Langford was incorporated as a municipality) the number of RCMP municipal police contracts rose from 43 to 56.

Between 1995 and 1997, the number of RCMP municipal contracts decreased by two contracts to 54. In 1995, Abbotsford (RCMP municipal force) and Matsqui municipalities amalgamated forming the Municipality of Abbotsford with an independent municipal force. In 1997, Fernie, as a result of the 1996 Canada Census, reverted from an RCMP municipal force to a provincial force jurisdiction.

The results of the 1996 Canada Census resulted in five municipalities - Hope, Ladysmith, Lake Country, Spallumcheen and Whistler - becoming responsible for providing municipal police services. Consequently, the number of RCMP municipal contracts increased to 59.

In 2002, as a result of the 2001 Canada Census, the municipality of Sooke, with a population exceeding 5,000, entered into a contract for RCMP municipal police services while the municipality of Port Hardy, with a population of less than 5,000, reverted from an RCMP municipal force to a solely provincial force jurisdiction.

First Nations Policing

The First Nations Policing Policy, announced in June of 1991 by the federal government, gives First Nations communities the opportunity to participate with provincial and federal governments in the development of dedicated policing services within their communities. The First Nations Policing Policy is designed to give First Nations communities greater control over the delivery and management of policing services within their communities.

First Nations Community Policing Services (FNCPS)

In 2005, there were 48 RCMP officers assigned to First Nations Community Policing Services (FNCPS). These officers serve many aboriginal communities. Each FNCPS unit is established under a tripartite agreement between the province, the federal government and the participating Band. The provincial share of funding the FNCPS is 48% while the federal share is 52%. The program represents an enhancement of the RCMP provincial police service. In early January 2006 there were 62 authorized FNCPS officers after a number of new agreements were signed.

Community Constable Program (ACCP)

In those communities where a tripartite agreement has not yet been signed, the RCMP continues to operate its Aboriginal Community Constable Program (ACCP). In 2005, under the ACCP, there were 36 First Nations officers serving a number of aboriginal communities. The province pays 54% and the federal government pays 46% of this cost-shared program.

First Nations Administered Police Services (FNAPS)

There are two First Nations Administered Policing Services (FNAPS) in British Columbia: Stl'atl'imx Tribal Police and Kitasoo-Xaixais Public Safety Department. Two others, Tsewulton and Ditidaht First Nation Public Safety and Policing Services, closed in 2000 and 2004 respectively. Each of these police services is modelled on the structure of an independent municipal police department, with governance provided by a police board whose members are selected from the communities served. Police officers recruited by the police boards are either experienced officers or graduates from the Police Academy of the Justice Institute of B.C. All officers are appointed under the Police Act.

Overview of Crime Data Collection in British Columbia

Every police department within British Columbia participates in the Uniform Crime Reporting (UCR) Survey. Managed nationally by the Canadian Centre for Justice Statistics (CCJS), the UCR Survey forms the basis of crime data collection within the province and across the country. The UCR Survey is designed to collect aggregate data on the incidence of crime. It records three major components for each criminal incident: the most serious offence (MSO) within the incident (by type and volume); clearance (by charge or by other means); and persons charged in connection with the offence (by gender and adult/youth).

Statistics Canada, in co-operation with the Canadian Association of Chiefs of Police, developed the UCR data collection system. Although some details of the UCR Survey have been modified since its implementation in 1962, the fundamental aspects of the UCR Survey have remained fairly constant since that time. This publication contains UCR data for the last ten years, 1996 to 2005.

In addition to the UCR Survey, the Ministry of Public Safety and Solicitor General receives more detailed data on specific crime categories such as homicide, sexual assault and spousal assault. These data are collected from three separate, but related, databases including the Operational Statistics Reporting (OSR) System, the UCRII database and the Homicide database.

The Uniform Crime Reporting (UCR) Survey

Provincially, UCR aggregate data are stored in the Police Management Information System (PMIS) maintained by Police Services Division (PSD). The PMIS contains data from 1977 onward. The data are updated monthly and quarterly.

Policing jurisdictions in B.C. perform periodic reviews or audits to ensure their crime data are recorded accurately. PSD also monitors this data to identify any discrepancies. As a result, the UCR data contained in this report are considered to accurately represent B.C.'s crime trends.

The collection, analysis and explanation of crime data can be complex due to the diverse ways in which the data can be examined. Different data collection systems produce different findings of the same series of events because the data reflect the definitions that are used and the manner in which information is gathered.

The UCR Survey records police-reported crime data. As such, UCR data contains only information on those crimes that come to the attention of the police and are reported by the police. UCR crime data does not contain a count of all crimes in B.C.; some crimes are never detected, and some that are detected are never brought to the attention of the police.

Victimization surveys provide data that are complementary to UCR data. These surveys are generally conducted by telephone and involve questions concerning the victimization of respondents. Victimization surveys contain information on a greater number of criminal incidents than the UCR data because victims are asked to describe both incidents they reported to the police and incidents they did not report. Victimization surveys contain methodological features that preclude information on such crimes as homicide and kidnapping, as well as "victimless crimes" (i.e., prostitution and drug offences), crimes committed against commercial or public property, and crimes committed against persons under sixteen years of age.

UCR Survey Rules

The police occurrence report forms the basis of data collection for the UCR Survey. There are standard rules for counting incidents, persons charged and clearance data under the UCR Survey. A review of the most basic UCR Survey rules, and the ramifications of each, are discussed below.

Unfounded Incidents

Reported offences (crimes reported by citizens to the police or crimes otherwise detected by police) are subject to a preliminary investigation by the police to determine the validity of the report. On occasion, a reported offence may not have actually occurred. For example, a vehicle that is reported stolen may turn out to have been borrowed by a family member. These incidents are considered "unfounded" and are subtracted from the number of reported offences to produce the number of actual offences.

In this publication, the number of offences always refers to actual rather than reported offences.

Number of Offences

The total number of UCR offences is not a census of all crimes that are reported by the police. This occurs for two reasons. Firstly, under the UCR Survey, most violent crimes (i.e., attempted murder and homicide, sexual offences, non-sexual assault, abduction) are scored differently from property and "other" crimes (i.e., prostitution, arson, and vandalism, among others). The number of violent offences recorded is equal to the number of victims involved in an incident of violent crime. For example, when one person murders three people, three offences are recorded, whereas when three people murder one person, only one offence is recorded. For all property crimes, other crimes, and the violent crime of robbery, the total number of offences recorded is equal to the number of distinct or separate incidents. For example, in an incident where several vehicles parked in one block are spray-painted with paint from the same spray can, only one incident of vandalism is reported.

The second reason that the total number of UCR offences does not represent the total of all crime reported by the police occurs as a result of the "most serious offence" (MSO) rule. The MSO rule stipulates that where a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. There are standard rules for determining the most serious offence where crimes in the same incident are of a similar severity. The application of the MSO rule tends to underestimate the true incidence of relatively less serious crimes that come to the attention of the police because these crimes are counted only when they do not occur in conjunction with a more serious crime in the same incident.

In short, the total number of UCR offences represents the number of victims of violent crimes plus the number of separate incidents of property and other crimes.

Clearance

When the police have identified at least one offender in relation to an offence and have sufficient evidence to solve the offence, a Report to Crown Counsel (RCC) recommending charges is completed and forwarded to the local Crown counsel office. Once an RCC is forwarded, the police consider the incident to be cleared by charge and this status is reported in the UCR Survey. This occurs even if the police have not yet apprehended the accused.

In some instances, the police identify an offender and have enough evidence to support a charge but do not recommend charges. Such offences are reported in the UCR Survey as "cleared otherwise"—that is, cleared other than by recommending charges to Crown. Offences are cleared otherwise in specific situations such as the offender is under the age of 12, the victim is uncooperative, the offender has diplomatic immunity, or the offender has been sentenced for other similar crimes.

Persons Charged

When an offence is cleared by charge, the number of persons recommended for charge by the police is recorded in the UCR Survey. These persons are categorized according to gender and age (adult vs. youth).

The UCR Survey reporting rules dictate that offenders who are simultaneously recommended for charge on more than one offence are counted only once against the most serious offence. In addition, offenders are counted each time the police recommend charges against them (for separate incidents). Consequently, the persons charged data represents a count of the number of persons for whom charges were recommended, rather than a count of the number of separate individuals recommended for charge. As a result, the correlation of persons charged data with court data is difficult because the UCR Survey does not contain information regarding the total number of recommended charges.

Time Lapse

UCR data are reported monthly by each of the reporting police departments and are available on this basis to interested users. Incidents are recorded in the UCR Survey against the months in which they came to the attention of police, regardless of when the incidents actually occurred. A criminal incident may be solved weeks or months after the incident is recorded in the UCR Survey. Consequently, a one-to-one relationship does not exist between the number of actual offences and the number of cleared offences in any given time frame.

Other Crime Databases

Operational Statistics Reporting (OSR) System

The Operational Statistics Reporting (OSR) System operates within the Police Information Retrieval System (PIRS) and is primarily utilized by the RCMP. The OSR is an incident-based database that stores more detailed information concerning criminal events including characteristics of the accused, victim and offence. In addition, the OSR permits the collection of special survey statistics within the province. For example, these special survey codes are used to identify cases involving spousal assault or child abuse.

Because the OSR contains three of the basic elements of the UCR Survey (i.e., MSO, clearance and persons charged), UCR aggregate data can be extracted from the OSR.

Uniform Crime Reporting II (UCRII) Survey

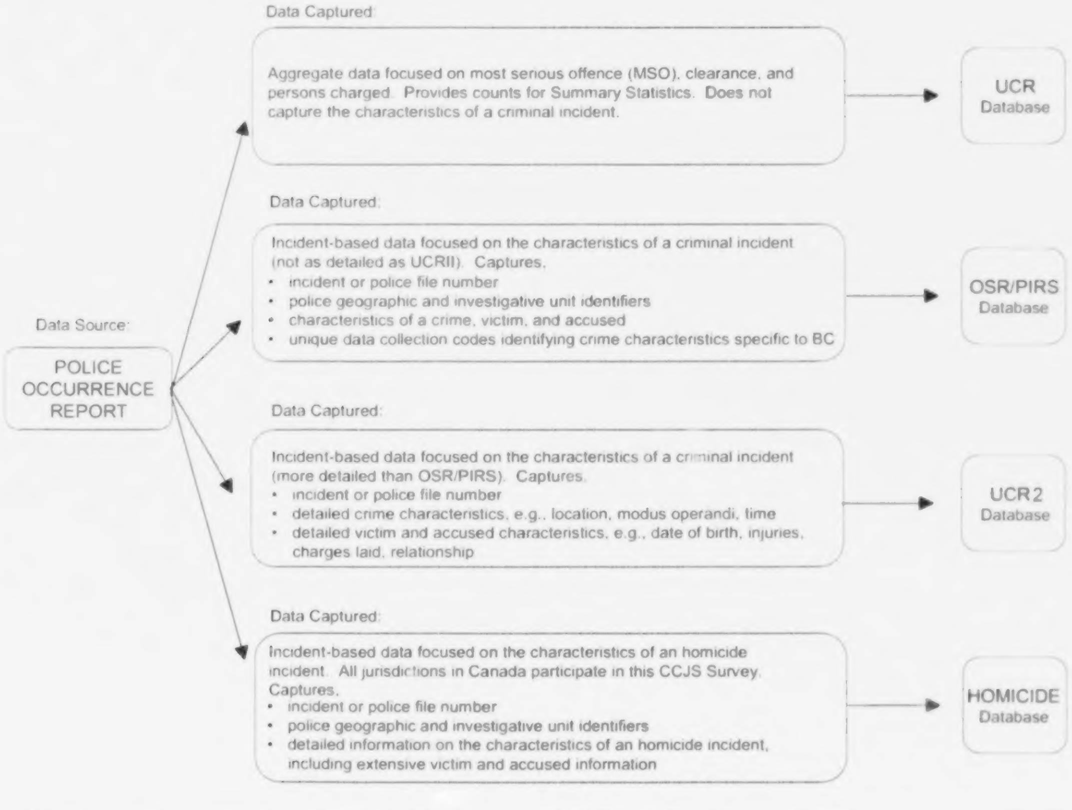
The UCRII Survey represents an expansion of the UCR Survey. It captures data at the incident level (similar to the OSR) as well as at the accused and victim levels. Examples of the data captured in the UCRII include detailed crime information (e.g., modus operandi, value of property lost), detailed accused information (e.g., date of birth, charges) and detailed victim information (e.g., date of birth, degree of injury and relationship between the victim and the accused). Because the UCRII contains three of the basic elements of the UCR Survey (i.e., MSO, clearance and persons charged), UCR aggregate data can be extracted from specific UCRII fields at the incident and accused levels. In 2005, 131 police services in 10 provinces supplied data for the complete year to the national UCRII Survey.

Prior to 2001, the Vancouver Police Department was the only police force in B.C. which contributed to the UCRII Survey. Since that time, a new integrated records management system suitable for use by all police agencies in the province was developed. This new system called PRIME (Police Records Information Management Environment) is designed to capture all the data elements of the UCRII Survey. As of 2005, PRIME has been implemented in 34 jurisdictions, and will be rolled out to the rest of the province over the next few years.

The Homicide Survey

All jurisdictions in Canada participate in the national Homicide Survey. Police agencies are required to complete a detailed survey questionnaire for each homicide they report. Aspects of the incident, including characteristics of the victim and accused, are recorded. The Homicide Survey database is administered and updated by the CCJS, and provided to PSD on an annual basis. Once the Homicide Survey data becomes available, it updates and replaces the UCR Survey homicide data.

Chart 1: Sources of Crime Data in British Columbia



Data Source:
POLICE OCCURRENCE REPORT
Data Captured:
Aggregate data focused on most serious offence (MSO), clearance, and persons charged. Provides counts for Summary Statistics. Does not capture the characteristics of a criminal incident.
UCR Database
Data Captured:
Incident-based data focused on the characteristics of a criminal incident (not as detailed as UCRII). Captures,
• incident or police file number
• police geographic and investigative unit identifiers
• characteristics of a crime, victim, and accused
• unique data collection codes identifying crime characteristics specific to BC
OSR/PIRS Database
Data Captured:
Incident-based data focused on the characteristics of a criminal incident (more detailed than OSR/PIRS). Captures,
• incident or police file number
• detailed crime characteristics, e.g., location, modus operandi, time
• detailed victim and accused characteristics, e.g., date of birth, injuries, charges laid, relationship
UCR2 Database
Data Captured:
Incident-based data focused on the characteristics of an homicide incident. All jurisdictions in Canada participate in this CCJS Survey. Captures,
• incident or police file number
• police geographic and investigative unit identifiers
• detailed information on the characteristics of an homicide incident, including extensive victim and accused information
HOMICIDE Database

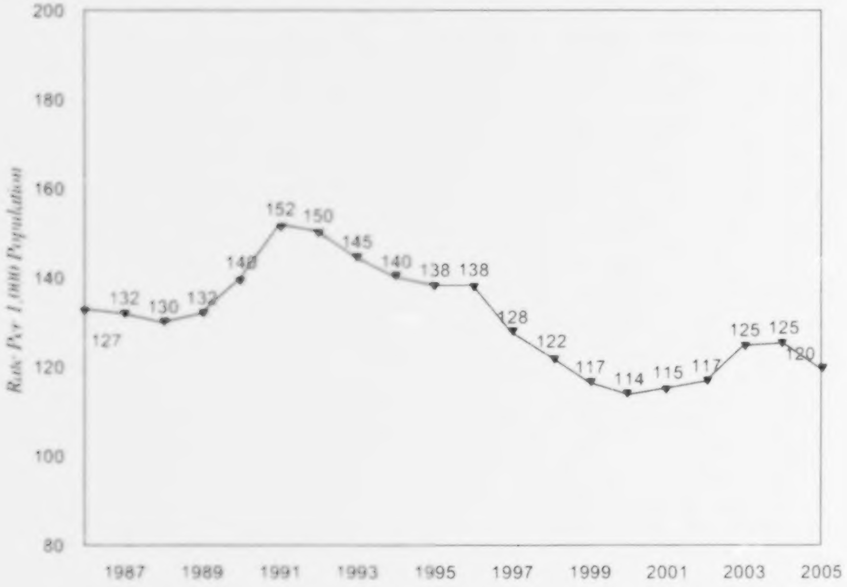
Summary of Crime in British Columbia

In 2005, there were 508,271 (non-traffic) crimes reported in British Columbia, representing a 4% (18,841) decline from the 527,112 crimes reported in 2004. The 2005 crime rate was 120 offences per 1,000 population, 5 % less than the crime rate of 125 offences per 1,000 population reported in 2004.

Figure 1: British Columbia Crime Rate, 1986 to 2005.



This chapter provides a brief description of the number and types of Criminal Code offences, municipal and provincial crime rates, the number of crimes solved, and the number of persons charged in British Columbia. At the end of the chapter there is a discussion of youth crime.

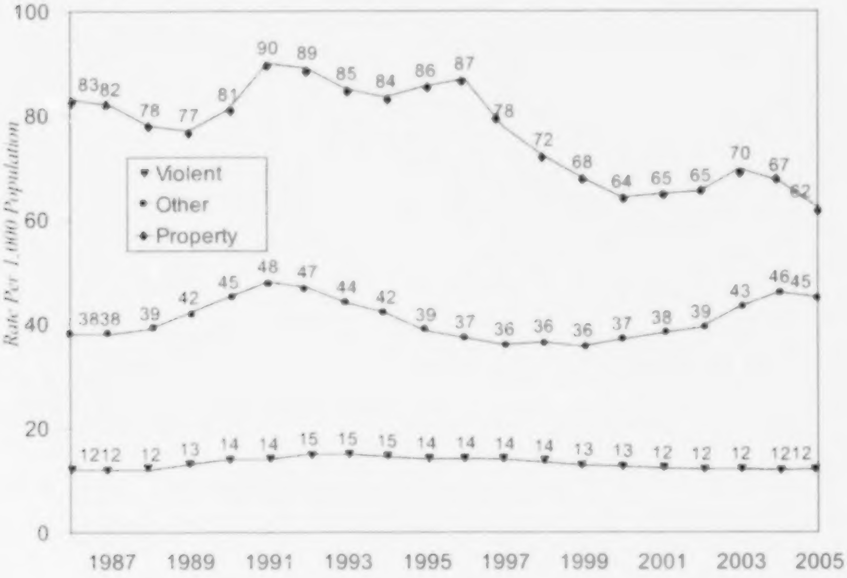
In Chapters 2, 3 and 4, the characteristics and trends of various Criminal Code offences are discussed in more detail. In Chapters 5 and 6, those offences arising from federal drug statutes, and Criminal Code and provincial traffic statutes are discussed.

Crime Rates

The crime rate is the number of Criminal Code offences reported for every 1,000 people. It is often a better measure of trends in crime than the actual number of offences because it allows for changes in population.

After peaking at a high of 152 Criminal Code offences per 1,000 population in 1991, B.C.'s crime rate decreased steadily over the next 10 years to a low of 114 crimes reported in 2000 (see Figure 1). During that time period, B.C.'s crime rate declined by 25%.

Figure 2: British Columbia Crime Rate by Category, 1986 to 2005.



In 2005 there were 508,271 reported Criminal Code offences, 18,841 less than reported in 2004.

From 2000 to 2003, B.C.'s crime rate rose by 9%, the first substantial increase in over a decade. However, in 2005, B.C.'s crime rate decreased by 5% to 120 crimes per 1,000 population. B.C.'s 2005 crime rate is one of the lowest reported in the province in over 20 years.

Fluctuations in the crime rate are quite often the result of changes in the number of property crimes. As shown in Figures 2 and 3, property offences have a major impact on the crime rate as they account for 52% of total reported crime. The property crime rate rose 8% between 2000 and 2003, after declining by 23% between 1994 and 2000. In 2005, B.C.'s property crime rate decreased by 8%.

Despite a slight decline reported in 2005 (-2%), B.C.'s other crime rate steadily increased since 2000, rising from 36 to 45 offences per 1,000 population, an increase of 25%. In contrast, B.C.'s violent crime rate has remained stable at 12 offences per 1,000 population over the past five years.

B.C.'s crime rate is traditionally higher than the national average. In 2005, with the exception of Saskatchewan, B.C.'s overall crime rate was higher than any other province. Although B.C.'s crime rate is often historically higher than the rest of the country, trends that are detected in the national crime rate data are frequently paralleled in B.C. (Please note this report does not include detailed comparisons with other provinces. National data are available from the Canadian Centre for Justice Statistics, Statistics Canada).

Factors Impacting on Police-Reported Crime Rates

A multitude of factors are believed to affect the crime rate. Examples of these factors include:

Demographics - Demographic shifts, or changes in the size and rate of the offenders group, are believed to have an impact on crime rates. For example, changes in the age and gender structure of a particular population, specifically males aged 16 to 24 years (the age group most likely to commit crimes), can influence crime rates.

Technological Change - Criminal activity has been changing rapidly over the past decade. With continual advances in technology, opportunities for new, more complex crimes have developed, creating new challenges for law enforcement.

Influences on Police Enforcement Practice - Policy decisions (such as the introduction of measures to deal with violence against women and children) or legislative changes (such as the introduction of the Youth Criminal Justice Act) can impact the prevalence rates or the reporting of some types of crimes.

Victim Response to Crime - Some experts argue that victim responses to crime cause cyclical patterns in the crime rate. When crime rates are rising, potential victims take self-protective measures, causing crime rates to moderate. Conversely, when crime rates are stable or decreasing, self-protective measures also decline, creating opportunities for criminal behaviour to increase again.

Societal Response to Crime - The public's decrease in tolerance for criminal acts can lead to a rise in reporting rates to police. Experts also argue that community-based policing initiatives (i.e., police-community partnerships to solve local crime problems) encourage citizens to come forward and report more incidents to police, thus impacting on crime rates.

Reporting Structures of Police Services - Differences in the ease of public reporting of crimes to police, as well as internal police records management systems, can impact on whether a criminal incident is collected by police and forwarded to the UCR program.

Other Factors - Factors such as inflation or economic hardship, and alcohol/drug consumption may also affect crime rates. Additionally, population density, changes in public attitude, and the level of income and education of either victim or offender may also affect the reporting of certain types of crimes.

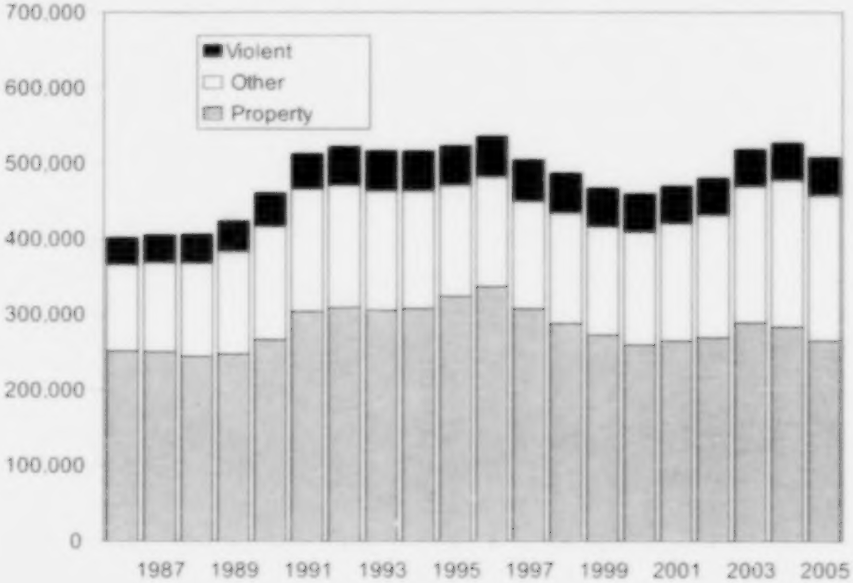
It is unlikely that a single factor accounts for changes in crime rates. More likely a combination of factors accounts for changes in trends.

The B.C. crime rate was 120 offences per 1,000 population in 2005, the first reported decrease in five years.

Criminal Code Offences

Criminal Code offences are divided into three major categories: crimes against persons (or violent crimes), crimes against property and "other" crimes. These Criminal Code categories do not include drug offences or offences under other federal statutes such as the Customs Act or the Canada Shipping Act. They also do not include offences under provincial statutes such as the Liquor Control and Licensing Act or the Securities Act, nor do they include Criminal Code traffic offences, provincial and municipal traffic offences, or other municipal by-law infractions.

Figure 3: Number of Crimes by Category, 1986 to 2005.



More often than not, a high crime rate indicates that a municipality is a core city or tourist destination.

In 2005, crimes against persons (violent offences) represented 10% (51,671) of all Criminal Code offences, crimes against property accounted for 52% (265,246), while the remaining 38% (191,354) were other crimes. These proportions have remained relatively constant over the last decade.

In 2005, there were 508,271 Criminal Code offences reported, 18,841 or 4% less than in 2004 and 10,386 or 2% less than in 2003. Between 1991 and 2000, the volume of crime in BC, similar to the crime rate, decreased by 10% (from 512,695 to 459,609 offences). Since 2000, the number of Criminal Code offences reported has increased by 10% or approximately 48,000 offences. Overall, the volumes of crime reported over the past four years are comparable to those reported a decade ago.

Municipal Crime Rates

The total BC municipalities crime rate was 124 offences per 1,000 population. In 2005, municipal crime rates (the number of crimes per 1,000 resident population in a particular municipality) ranged from a low of 34 to a high of 301 Criminal Code offences per 1,000 population.

Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a "core" city or tourist destination. Core cities are usually surrounded by urban or unincorporated areas which have significant residential populations. These cities are the business and entertainment centres for a large number of people who reside outside as well as inside the municipality. Tourist destinations often have large "part-time" populations relative to their resident populations. Part-time populations include tourists, vacation home owners, students or seasonal staff.

A municipal crime rate is based on the resident population of a municipality. If a person living outside a municipal boundary enters and commits a crime, that crime is attributed to the municipality in which the crime was committed. Since the person does not reside within the municipality, he or she is not included in the municipal resident population. Consequently, core cities and tourist destinations often have higher than average crime rates. If core cities expanded their boundaries to include the residential areas outside their borders, crime rates for the combined populated areas would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

Although municipal crime rates cannot be used to measure the relative safety of one location over another, they can be considered an indicator of crime trends within each municipality. If two municipalities share similar characteristics, comparing their actual crime rates may be valid. However, these comparisons should be made with caution.

In 2005, police solved (cleared) 22% of all reported Criminal Code offences.

Crimes Cleared (Solved)

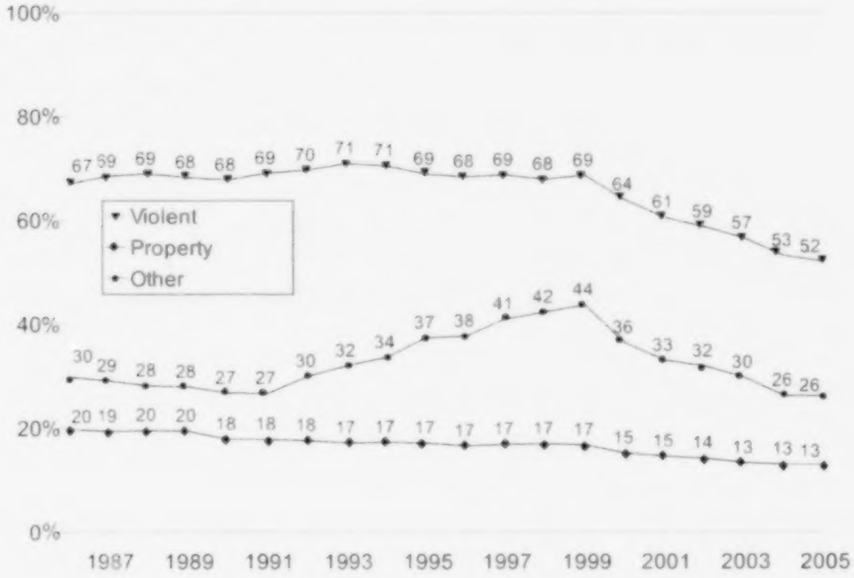
When police solve an offence, they record whether it has been cleared by charge or cleared by other means. An offence is defined as cleared by charge when the police file a Report to Crown counsel (RCC) recommending charges be laid. An offence is defined as cleared by other means when the police have identified an offender and have enough evidence to support a charge, but for a variety of reasons do not recommend a charge. Offences can be cleared by other means under specific circumstances. These include situations where the victim is uncooperative or the offender is either dead, under 12 years of age, has diplomatic immunity, or was previously sentenced for a similar crime. Police can also clear offences by other means in discretionary situations where they do not proceed with charges even though the offender has been identified and they have sufficient evidence to proceed.

In 2005, 22% (111,391) of all reported Criminal Code offences were cleared (solved). Approximately 12% (58,502) were cleared by charge, and 10% (52,889) were cleared by other means.

The clearance rate is the number of crimes solved by police as a percentage of the number of crimes reported to police. There is a considerable difference in the clearance rates for violent crimes compared with property and other crimes. In 2005, 52% (27,054) of violent crimes were cleared as opposed to only 13% (34,270) of property crimes and 26% (50,067) of other crimes.

Between 1993 and 1999, the percentage of violent crimes cleared remained relatively stable, ranging from 68% to 71%. During the last six years, however, the violent crime clearance rate decreased by an average of 5% a year. In 2005, 52% of violent crimes were cleared.

Figure 4: Percentage of Crimes Cleared 1986 to 2005.



In 2005, of the 57,817 persons recommended for charge, 90% were adults and 10% were young offenders.

The property crimes clearance rate remained stable at 17% between 1993 and 1999. In recent years, however, the clearance rate for these crimes decline to 13%.

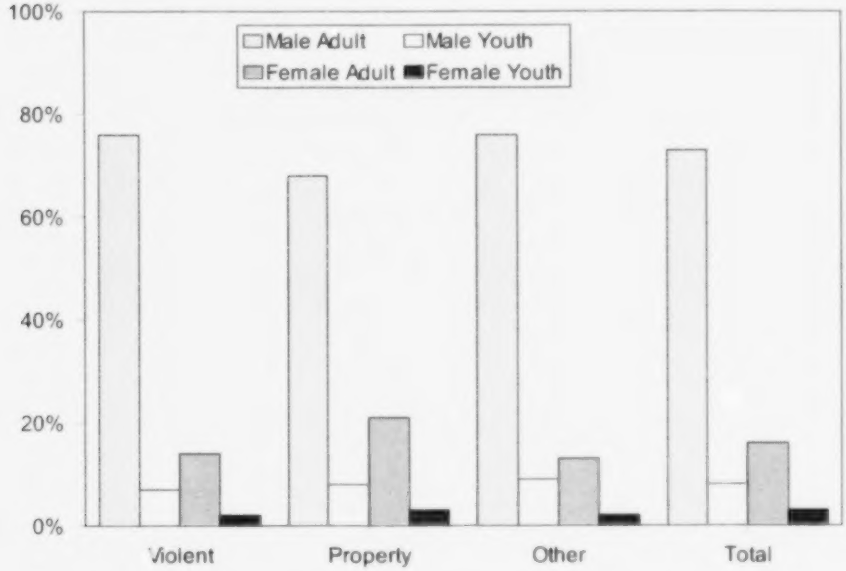
The clearance rate for other crimes steadily increased from a low of 27% in 1991 to a high of 44% in 1999. In 2000, however, the other crime clearance rate dropped to 36% and subsequently declined to 26% where it has remained for both 2004 and 2005.

Persons Charged

In 2005, the police reported that 57,817 persons were charged with Criminal Code offences in British Columbia. Since Crown counsel determines whether a charge will be laid, this figure actually represents the number of persons recommended for charge by the police.

Of the 57,817 persons charged, 32% (18,402) were charged with crimes of violence, 38% (21,766) with property crimes, and 31% (17,649) with other crimes. By comparison, violent crimes represented only 10% of reported crime, while property crimes and other crimes represented 52% and 38% respectively.

Figure 5: Persons Charged in B.C. by Gender and Type of Offence, 2005.



There is no offence known as youth crime; rather, the determination that an accused person is a young offender is based on the age of the offender at the time the offence was committed.

Persons charged data are divided into four categories: adults, male and female; and youths, male and female. In Canada, a young offender (youth) is between 12 and 17 years of age and an adult offender is 18 years and older. In 2005, of the 57,817 persons recommended for charge, 10% (6,058) were young offenders and 90% (51,759) were adults.

In 2005, approximately 82% (42,337) of the 51,759 adults charged and 78% (4,591) of the 6,058 youths charged were male. These proportions have remained constant over the last decade.

In 2005, adults represented 90% (16,594) of persons charged with violent crimes, 89% (19,444) of persons charged with property crimes and 89% (15,721) of persons charged with other Criminal Code offences. Young offenders represented 10% (1,808) of persons charged with violent crimes, 11% (2,322) of persons charged with property crimes and 11% (1,928) of persons charged with other Criminal Code offences.

Youth Crime

In B.C., as in the rest of Canada, young persons between the ages of 12 and 17 who break the law are subject to the same charges as adults. There is no offence known as youth crime; rather the determination that an accused person is a young offender is based on the age of the offender at the time the offence was committed.

Detecting the real extent of youth involvement in crime is difficult. The data discussed below are based on the number of youths charged with criminal offences, i.e., the number of youths for whom the police submitted a report to Crown counsel. Unless the police solve the offence, it is not known whether an adult or youth committed the crime. Therefore, data on youth crime are dependent on the identification of the offender by the police. Though only 22% of total reported crimes are solved, it is assumed that the youths charged data (the number of Criminal Code charges reported per 1,000 population between the ages of 12 and 17) provide an indication of trends in youth involvement in crime.

Legislative Changes Dealing With Young Offenders

On April 1, 2003, the Youth Criminal Justice Act (YCJA) replaced the Young Offenders Act. The new legislation is primarily aimed at differentiating between violent or repeat offenders, and first-time offenders who commit non-violent or less serious crimes. The YCJA stipulates sentencing based on the seriousness of the crime and encourages sentencing which is community based (i.e., victim compensation, community service and supervision). In addition, the Act provides for the imposition of adult sentences as well as rehabilitative custody and supervision sentences in the case of violent and high-risk offenders.

In 2005, 70% of the criminal offences for which young people were charged were non-violent crimes.

Youth Crime in 2005

In B.C., there were 6,058 young offenders charged with Criminal Code offences in 2005, 661 or 10% less than in 2004. This represents a youths charged rate of 19 charges per 1,000 youths, an overall decrease of 10% from B.C.'s youths charged rate in 2004.

Youths represented 10% (6,058) of total persons charged in 2005. Of those youths charged, 30% (1,808) were charged with violent offences, 38% (2,322) were charged with property offences, and 32% (1,928) were charged with other Criminal Code offences.

Approximately 70% (4,520) of the criminal offences for which young people were charged were non-violent crimes. The remaining 30% (1,808) of charges against youths were for violent crimes.

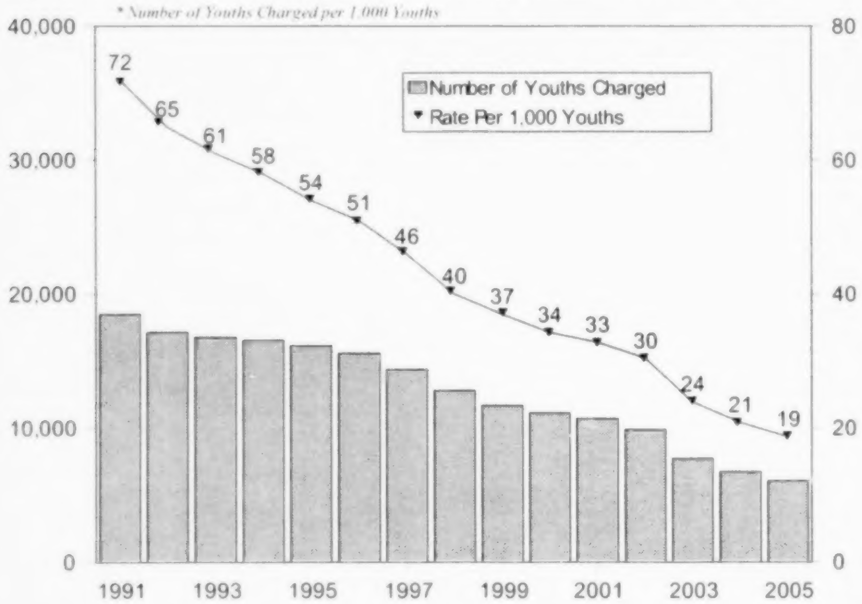
Substantially more male youths are charged with Criminal Code offences than female youths. In 2005, 76% (4,591) of the youths charged with Criminal Code offences were male.

Youth Crime Trends

During the last ten years, the total population of B.C. youths increased by 5% from 307,651 in 1996 to 324,433 in 2005. During this period, the proportion of youths in the province has, however, remained relatively stable at approximately 8% of the total population.

In 1991, the youths charged rate peaked at 72 offences per 1,000 youths. Since that time, B.C. has experienced a downward trend in youths charged rates. During the past decade, the youths charged rate decreased 63%, from 51 offences per 1,000 youths in 1996 to 19 offences per 1,000 youths in 2005. There were 6,058 charges laid against youths in 2005 compared with 15,571 charges laid in 1996, a similar decrease of just over 60%.

Figure 6: Youths Charged, Number & Charge Rates, 1991 to 2005.*



* Number of Youths Charged per 1,000 Youths

In 2005, youths represented 10% of persons charged with violent crimes.

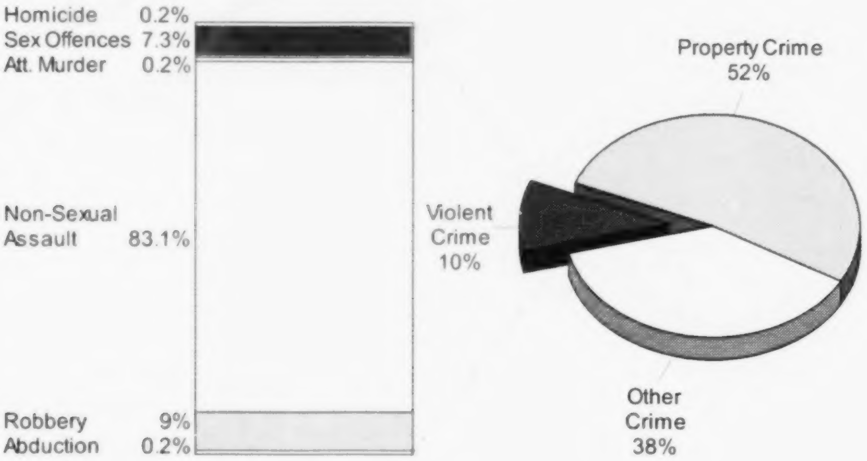
The rate of youths charged with violent crimes increased steadily following the implementation of the Young Offenders Act in 1985, peaking at 11 charges per 1,000 youths in 1994. From 1995 to 1998, this rate stabilized at an average of 10 charges per 1,000 youths. Between 1999 and 2005, however, the rate of youths charged with a violent crime decreased from 8 charges per 1,000 youths to 6 charges per 1,000 youths. Crime data over the past ten years indicate that youths charged with level 1 non-sexual assault (the least serious assault category) represented almost 50% (819) of B.C. youths charged with violent crimes. It is increases or decreases in this category of crime that largely contribute to fluctuations in the rate of youths charged with violent crimes.

The number of female youths charged in B.C. peaked in 1995 with 3,846 charged and has fallen since that time reaching a low of 1,467 female youths charged in 2005, a decrease of 62%. Similarly, the number of male youths charged in B.C. peaked in 1994 with 12,841 charged. Since that time, this number has declined to 4,591 male youths charged in 2005, a 64% decrease.

CHAPTER 2

Violent Crime in British Columbia

Figure 7: Violent Crime by Category, 2005.



Crimes against persons, more commonly called violent crimes, are considered the most serious of the three Criminal Code offence categories. Approximately 10% of all crime reported during 2005 was categorized as violent. These crimes include homicide, attempted murder, sexual and non-sexual assault, robbery and abduction. Crimes in this category carry the maximum penalty under the law.

Violent Crime in 2005

There were 51,671 violent offences in 2005, 1,282 more than the 50,389 violent offences reported in 2004, resulting in a 3% increase in the number of violent crimes and a 1% increase in the violent crime rate (from 12.0 violent crimes per 1,000 population in 2004 to 12.1 violent crimes per 1,000 population in 2005).

More violent crimes are cleared (solved) than any other type of crime. In 2005, 52% (27,054) of violent crimes were cleared as opposed to only 13% (34,270) of property crimes, and 26% (50,067) of other crimes. Not only are more violent crimes cleared than any other type of crime, but more are cleared by charge. In 2005, 36% (18,571) of violent crimes were cleared by charge, whereas 8% (20,017) of property crimes and 10% (19,914) of other crimes were cleared by charge.

Of the 18,402 persons charged with violent offences in 2005, 76% (14,013) were adult males, 14% (2,581) were adult females, 7% (1,363) were male youths and 2% (445) were female youths.

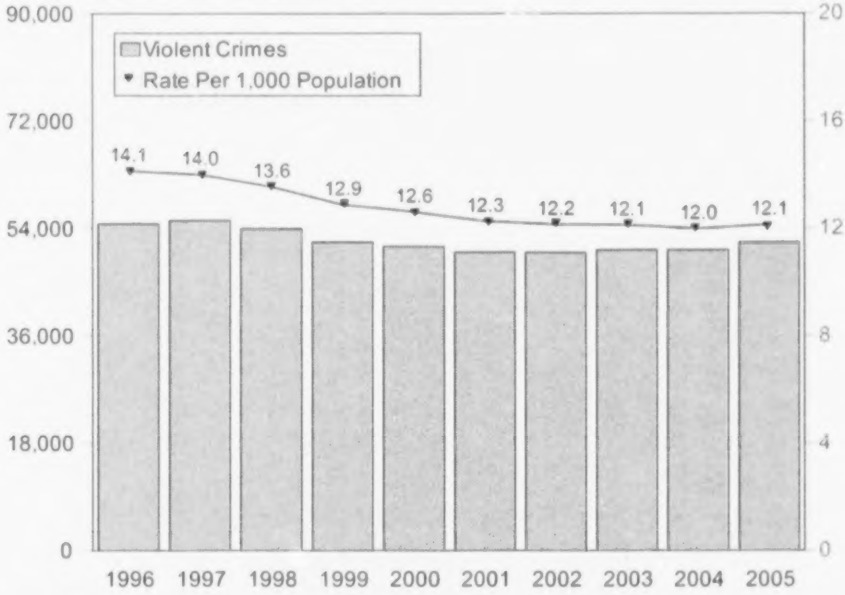
Violent Crime Trends

After peaking at 55,326 offences in 1997, violent crimes had decreased annually at a rate of 2% per year until 2003 when the number of violent crimes increased for the first time in six years. After falling slightly in 2004, the number of violent crimes increased by 3% to 51,671 offences in 2005.

Since 1996, the violent crime rate continually decreased until rising slightly in 2005. It fell from 14.1 violent crimes for every 1,000 persons in 1996 to 12.0 in 2004, an overall decrease of 15%. In 2005, the violent crime rate increased by 1% to 12.1 offences per 1,000 population. As with the number of violent crimes, the violent crime rate, while decreasing over the past decade, is still almost 10% higher than 20 years ago.

While the number of violent crimes has declined over the past decade, the number reported in 2005 is still 15% higher than fifteen years ago.

Figure 8: Number and Rate of Violent Crimes, 1996 to 2005.

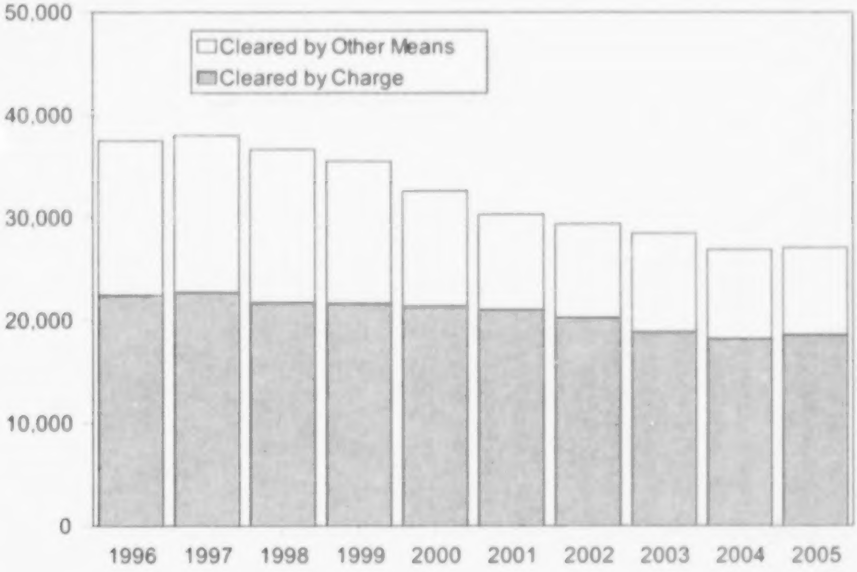


It is important to note that fluctuations in violent offences over the past twenty years may be due to factors other than an increase in the number of these crimes being committed. Changes to federal legislation concerning sexual and non-sexual assault have likely had an impact on the reporting of these offences. Under the revised legislation the previous categories of assault and battery were merged into one offence, and the types of assault reorganized into a three-tiered system of offences based on the seriousness of harm and violence. Moreover, procedural changes to the legislation enhanced the ability of police to make arrests and recommend charges. Heightened public awareness and reduced tolerance of violence may also have led to increased reporting of violent crimes. Finally, the stigma of being victimized may be less pronounced today than previously. As a result, crimes of violence that occurred in the past are being reported and recorded in the present.

Despite the overall increase in violent crime during the past 20 years, within the past decade, there have been decreases in the categories of homicide, attempted murder, sexual offences and robbery. In total, the number of offences reported within these categories declined by 26% from 11,654 in 1996 to 8,618 in 2005, primarily driven by declines in the number of reported robbery offences and sexual offences. During this period, however, the violent crime category of non-sexual assaults remained relatively stable at approximately 42,000 offences.

Increases in reported violent offences over the past 20 years may be due to factors other than an increase in the number of these crimes being committed.

Figure 9: Number of Violent Crimes Cleared (Solved), 1996 to 2005.



Between 1996 and 2005, the number of sexual offences reported decreased by 26% (1,310 offences) falling from 5,104 offences reported in 1996 to 3,794 offences reported in 2005. Overall, during this time period, level 1 sexual assaults decreased by 25%, level 2 sexual assaults decreased by 43%, and level 3 sexual assaults decreased by 36%.

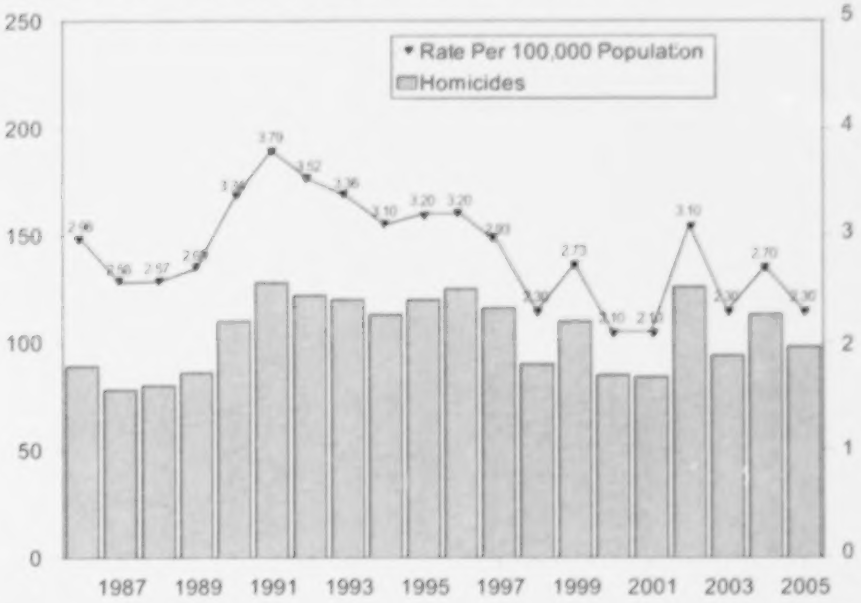
The overall decline in the number of violent crimes has been offset by the relative stability in the number of level 1 assault offences reported. Over the past 10 years, the number of level 1 assault offences reported averaged approximately 34,000 offences annually. Level 1 assault represents two-thirds of violent crimes reported and is the major driver of violent crime rates.

The number of persons charged with violent crimes decreased by 16% in the last ten years. In 2005, 18,402 persons were charged with violent offences compared with the 21,966 persons charged in 1996.

Homicide

In Canada, homicide offences are classified into four categories as defined by the Criminal Code: first degree murder, second degree murder, manslaughter and infanticide. First degree murder occurs when the death is planned and deliberate, or occurs during the commission of another serious offence or when the victim is a peace officer. Second degree murder is all murder that is not in the first degree. Manslaughter is generally a homicide committed in the heat of passion. Infanticide occurs when a mother causes the death of her newly born child. Deaths caused by criminal negligence, suicide, accidental or justifiable homicide are not included in the criminal homicide classification.

Figure 10: Number and Rate of Homicides, 1986 to 2005.



There were 98 victims of homicide reported in 2005.

Homicide in 2005

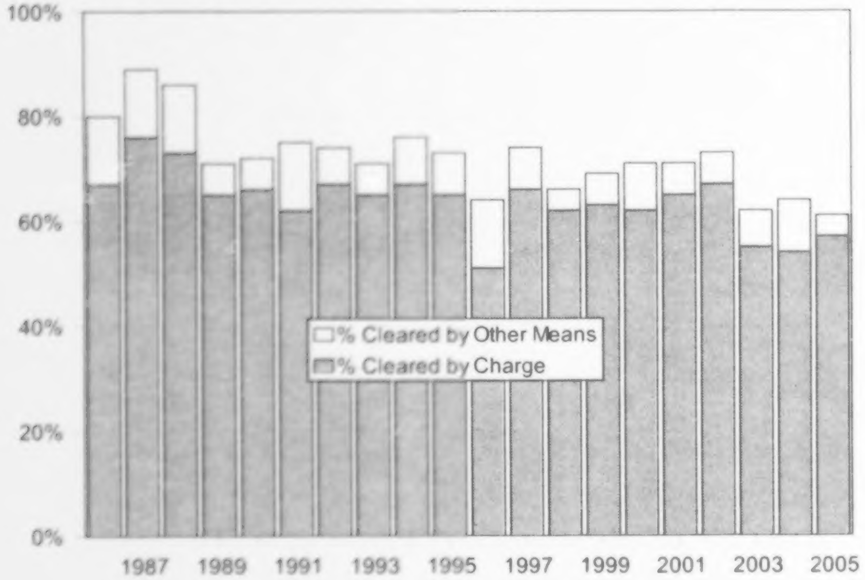
In 2005, there were 98 homicide victims in B.C., representing a 13% decrease from the 113 homicides reported in 2004. Since the number of homicides reported is relatively small, homicide rates are calculated on a per 100,000 population basis. In 2005, the homicide rate was 2.3 homicides per 100,000 population, below the ten year homicide rate average of 2.6 homicides a year.

Of the homicides reported in 2005, 41% (40) were first degree, 49% (48) were second degree and 10% (10) were manslaughter. There were no reported infanticides in 2005.

Police cleared (solved) 61% (60) homicides in 2005, 57% (56) by charge and 4% (4) by other means. Over the past decade, homicide clearance rates have fluctuated between 61% and 73%. Caution should be used in interpreting homicide clearance rates. Homicides may be solved many months or years after the year in which the homicide was reported. As a result, the number of homicides reported and the number of homicides cleared for a specific year are not necessarily linked.

There were 74 persons charged with homicide in 2005, 82% (61) were male adults, 9% (7) were female adults, and 8% (6) were male youths. As in previous years, the large majority, 91% (67), of persons charged with homicide were male and only 8% (6) of persons charged were young offenders.

Figure 11: Percentage of Homicides Cleared, 1986 to 2005.



Police charged 74 persons with homicide in 2005.

Homicide Trends

Historically there have been more homicides per capita reported in B.C. than in any other province. However, in 2005, B.C.'s ranking amongst the provinces dropped to fifth and was only slightly above the national homicide rate (the national homicide rate in 2005 was 2.0 homicides per 100,000 population).

An average of 104 homicides per year have been reported in B.C. over the past decade, ranging from a high of 126 recorded in 2002 to a low of 84 reported in 2001. The 98 homicides reported in 2005 are below the ten year average.

In 2005, the homicide rate was 2.3 homicides per 100,000 population, a 14% decrease from the 2004 rate of 2.7 homicides per 100,000 population. During the past 25 years, the homicide rate has fluctuated between 2.1 and 4.4 homicides per 100,000 population. The 2000 and 2001 homicide rates (2.1) were the lowest recorded rates in British Columbia over this time period.

Over the last two decades in British Columbia there have been substantially more male victims of homicide, sometimes up to three times as many as female victims.

Homicide Survey Results

In 1999, Police Services Division conducted a survey of homicide offences in British Columbia, the results of which were released in B.C. Crime Trends Newsletter, Issue #4, (September 2000). Even though each homicide is a unique criminal event, the survey revealed the following characteristics of homicides in B.C.:

- A "typical" murder is committed in a single home by a male adult between 18 and 34 years of age.
- The victim is a male between 19 and 34 years of age and the homicide is usually precipitated by an assault.
- The accused is a casual acquaintance of the victim.
- The victim will have been either stabbed or shot.
- The police, in most cases, solve the homicide through the laying of charges.

B.C.'s Integrated Homicide Units

In 1996, the provincial government announced the creation of the Unsolved Homicide Unit, an integrated police unit made up of members from the RCMP and the Vancouver Police Department. The purpose of the Unit is to ensure the effective coordination of investigations into unsolved homicides that have occurred over the past 35 years.

The Integrated Homicide Investigation Team (IHIT) was created in 2003. It investigates all homicides, suspicious deaths, police shootings, in-custody deaths, and serious attempted murders. IHIT partners include a number of Lower Mainland municipalities.

In 2005, there were 107 attempted murders reported, a 23% increase from 2004.

Attempted Murder

In 2005, there were 107 attempted murder offences in British Columbia. This is a 23% increase from the 87 offences reported in 2004. Over the past decade an average of 104 attempted murders were reported annually in B.C. A high of 136 attempted murders was reported in 1997.

The attempted murder rate in 2005 was 2.5 offences per 100,000 population (as with homicides, attempted murder rates are calculated on a per 100,000 population basis). From 1996 to 2005, the attempted murder rate ranged from a high of 3.4 reported in 1997 to a low of 2.1 reported in both 1999 and 2004. The average reported attempted murder rate for the same period is 2.6 offences.

In 2005, 60% (64) of attempted murders were cleared. Of those attempted murders cleared, 98% (63) were cleared by charge. On average, the attempted murder clearance rate was 74% over the past decade.

There were 76 persons charged with attempted murder in 2005, 93% (71) of whom were adults. As in previous years, the majority of persons charged (64 or 84%) were male. Only 7% (5) of total persons charged were young offenders.

Sexual Assaults and Other Sexual Offences

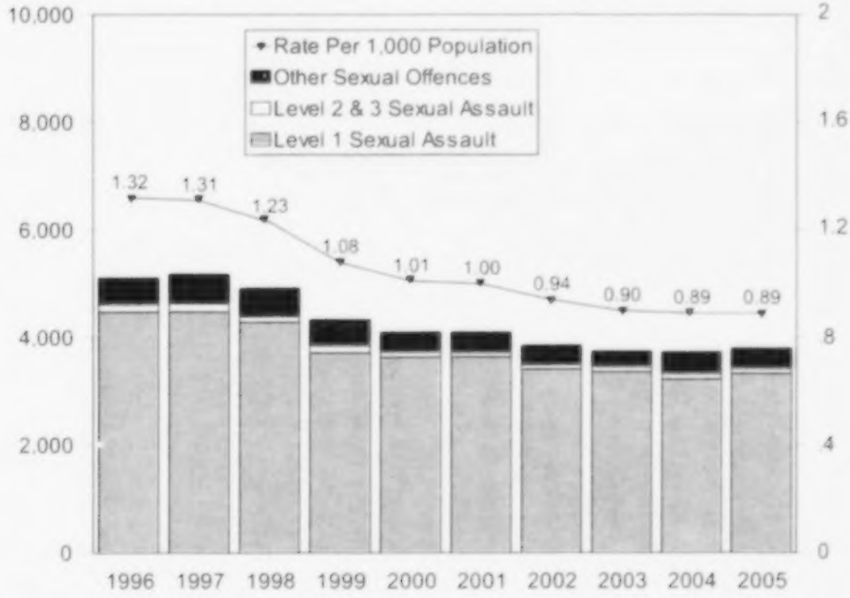
Law reforms introduced by the Canadian government in 1983 and 1988 served to change the substantive, procedural and evidentiary aspects of Canada's rape law. Under the revised legislation, the crimes of rape, attempted rape and indecent assault were repealed and replaced with a three-tiered system of sexual assault. In addition, new sexual offences were introduced to deal specifically with child sexual abuse (i.e., sexual interference, touching and exploitation).

The three-tiered system of sexual offences is based on the seriousness of harm and violence. Level 1 sexual assault occurs when any form of sexual activity without bodily harm is forced upon another person; level 2 sexual assault occurs when a person is sexually assaulted by someone who uses or threatens to use bodily harm or a weapon; and level 3 sexual assault occurs when a person wounds, maims, disfigures, beats or endangers the life of a person during a sexual assault.

The intent of the law reforms was threefold: first, to reflect the violent rather than the sexual nature of the offences; second, to expand the opportunities for courts to receive children's testimony in cases of child sexual abuse; and, finally, to broaden the scope of sexual offences by presenting the offences as gender neutral as opposed to offences against females only.

The 2005 sexual offence rate of 0.89 per 1,000 population is 60% higher than the rate recorded 25 years ago

Figure 12: Number and Rate of Sexual Offences, 1996 to 2005.



Sexual Assault in 2005

In 2005, a total of 3,794 sexual assaults and other sexual offences were reported in British Columbia, an increase of 67 offences or 2% from the 3,727 offences reported in 2004. Of the majority of sexual crimes reported in B.C. in 2005, 87% (3,334) were classified as level 1 sexual assaults whereas 2% (81) were level 2 and level 3 sexual assaults. The remaining 10% (379) included other types of sexual offences, such as sexual touching or interference, sexual exploitation and incest.

The sexual offence rate (the number of sexual offences per 1,000 population) in 2005 was slightly less than 1 per 1,000 population. Of the 3,794 sexual crimes reported, 44% (1,659) were cleared, 35% (1,323) by charge and 9% (336) by other means.

Of the 1,138 persons charged with sexual offences in 2005, 85% (972) were male adults, 1% (16) were female adults, 13% (149) were male youths and less than 1% (1) were female youths. These proportions have remained about the same over the last ten years.

Sexual Assault Trends

Level 1 sexual assault has consistently represented close to 90% of sexual offences reported and is a major driver of sexual assault rates. A ten year trend analysis of sexual offences reveals that the total number of reported offences was highest in 1997 at 5,176 offences and has been declining since that time.

Level 1 sexual assaults represent almost 90% of reported sexual offences.

Despite the recent decreases, the number of reported sexual offences has grown substantially since the early 1980s, not only in B.C. but also across Canada. The sexual offence rate peaked at a high of 1.8 in 1992 and 1993, but has been steadily declining since that time. Even though the 2005 sexual offence rate of 0.89 per 1,000 population is among the lowest rate reported in more than ten years, it is approximately 60% higher than the rate recorded 25 years ago.

Trends in sexual assault offences have likely been influenced by many factors, including higher levels of reporting, changes in societal attitudes toward the reporting of sex crimes, the reporting of historical sexual offences, and changes in federal legislation discussed above.

Sexual Assault Survey Results

Police Services Division conducted a survey of sexual assaults reported to police during 1993 and 1994. The findings of this survey are available in full from Police Services Division's Survey of Sexual Assaults Reported to Police in British Columbia, 1993-1994. The survey revealed the following characteristics of a "typical" sexual assault in B.C.:

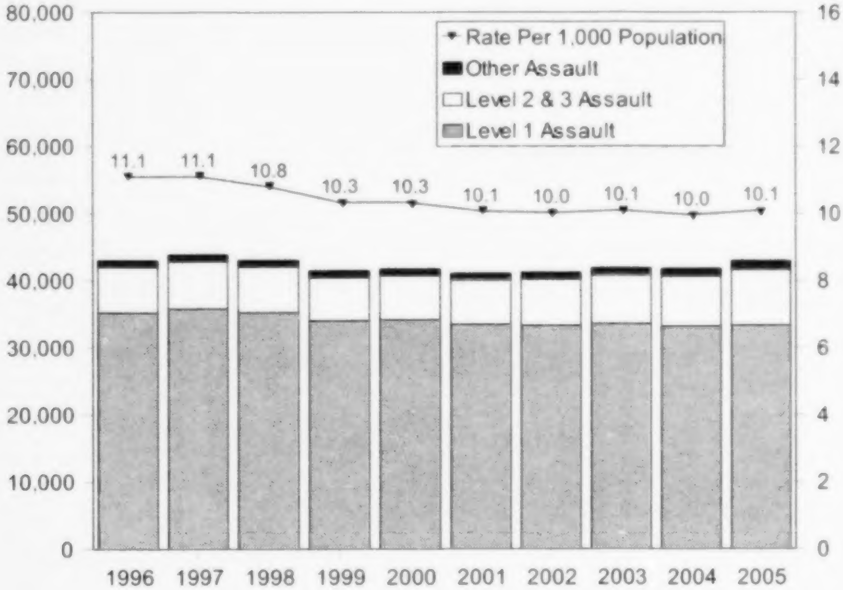
- The victim is female under the age of 19 (if under the age of 19 then the victim is likely between the ages of six and 12).
- The accused is male, over the age of 17, and is either a family member or a friend of the victim.
- If the accused is a male relative of the victim, then he is most likely her father or stepfather.
- The offence occurs once or during a period of less than one month, and takes place at the victim's home, the accused's home or a home shared by both.
- Fifty percent of the persons charged with a sexual assault have a previous criminal record; the record, however, the record is not likely for violent or sexual offences.
- The police will clear (solve) the offence, most likely by recommending charges.

Non-Sexual Assault

Revisions to federal assault legislation established three levels of non-sexual assault offences similar to those provided for sexual assaults. Level 1 non-sexual assault, the least serious of these offences, does not involve a weapon or serious physical injury, level 2 involves a weapon or results in bodily harm, and level 3 is aggravated assault or assault that is life-threatening. The ability of the police to make arrests and recommend charges in all types of assaults was enhanced by these revisions.

In addition to the three levels of assault, non-sexual assaults also include the offences of assaulting a police officer or other officer, shooting with intent (firing a gun, rifle or airgun with the intention of hurting or endangering the life of another person), and causing unlawful bodily harm (any intentional harm to another person by any means).

Figure 13: Number and Rate of Non-Sexual Assaults, 1996 to 2005.



In 2005, 55% of assaults were cleared (solved).

Non-Sexual Assault in 2005

In 2005, 42,941 assaults were reported, representing an increase of 3% (1,145 offences) from the 41,796 assaults reported in 2004. Non-sexual assaults accounted for 83% of the 51,671 violent crimes reported in B.C. in 2005.

In 2005, 78% (33,307) of assaults were classified as level 1, compared with 19% (8,008) as level 2, and less than 1% (288) as level 3 offences. Other assault offences accounted for the remaining 3% (1,338) of these types of offences.

In 2005, 55% (23,276) of assaults were cleared (solved), 37% (15,780) by charge and 19% (8,016) by other means.

Of the 15,497 persons charged with assault in 2005, 91% (14,100) were adults and the remaining 9% (1,397) were youths between 12 and 17 years of age. Males represented 83% (11,707) of the adults charged and 71% (991) of youths charged.

Non-Sexual Assault Trends

During the past decade, assaults have accounted for four out of five violent crimes. The number of Level 1 assaults accounts for approximately 80% of all non-sexual assaults and two out of three violent crimes. The large proportion of Level 1 assaults drives the overall non-sexual assault rate as well as the violent crime rate.

Between 1996 and 2005, the volume of Level 1 assaults declined by 5%. During the same time period, the combined number of Level 2 and Level 3 assaults as well as other assault categories (e.g., assault of a police officer, shoot with intent) increased by 24%, rising from a total of 7,785 offences in 1996 to 9,634 offences in 2005. Increases and decreases reported in the various assault categories has resulted in a relatively stable number of assaults reported each year over the last decade (averaging just over 42,200 assaults reported per year). The rate of assaults declined over the same decade, dropping from 11.1 offences per 1,000 population in 1996 to 10.1 offences in 2005.

During the past decade, four out of five violent crimes were assaults.

Non-Sexual Assault Survey Results

Police Services Division conducted a survey of non-sexual assaults reported to police during 1995. The survey revealed the following characteristics of a "typical" level 1 assault in B.C.:

- The victim is equally likely to be male or female and is most likely between the ages of 18 and 35.
- Eight out of ten accused are male and are most likely between the ages of 18 and 35.
- In two-thirds of the incidents the victim and accused know each other.
- Three out of ten level 1 assaults are spousal assaults.
- In almost half the incidents the assault takes place in the victim's home, the accused's home, or a home shared by both.
- One in ten assaults occurs in a bar or restaurant.
- More than half of the accused charged with level 1 assault have a prior criminal record, and 40% of those records are for a previous violent or weapons offence.
- More than one-third of the incidents are cleared by charge by the police. Crown counsel proceeds with police-recommended charges 85% of the time.
- In more than 40% of the incidents where charges are laid, the accused is convicted of at least one criminal offence.
- In the remaining incidents proceeded with by Crown, the accused is not convicted. For those charges that end in a non-conviction, charges are most frequently stayed (with or without a recognizance).

Spousal Assault

There is no Criminal Code offence known as spousal assault; rather, the determination of a spousal assault is based on the finding that at some point within a criminal incident an offender committed violence (e.g., homicide, assault) against his or her spouse. As such, the number of spousal assault incidents reported represents the number of Criminal Code incidents that contain supplementary information indicating that violence against a spouse occurred.

The number of spousal assault incidents does not necessarily count the number of different victims of a spousal assault. For example, if the same person is a victim of spousal assault at different times and has reported these crimes to police when they occurred, each incident would be recorded separately, and in effect the same victim would be counted more than once.

The reporting of spousal assault offences in British Columbia is supported by the provincial government's Violence Against Women in Relationships (VAWIR) policy. The VAWIR policy directs officials in the justice system (including police, Crown counsel, probation officers, victim assistance workers, and others) to emphasize the criminality of violence and to take the necessary measures to ensure the protection of women and children who may be at risk. The policy states that when attending an incident involving violence between spouses, and where there are grounds to believe an offence has occurred, police officers should always make an arrest when it is in the public interest. The policy shifts the responsibility to lay charges from the victim to the criminal justice system. The policy defines a spouse as a marital partner, a common-law partner or a partner in a dating or intimate relationship. Spousal assaults also include assaults between partners in same-sex relationships.

In 2002, British Columbia's spousal assault policy (VAWIR) was revised. These policy changes recognized the difficulties inherent in prosecuting spousal assault cases. Crown counsel now has enhanced prosecutorial discretion as well as a number of other measures designed to resolve low-risk spousal assault cases outside of the courtroom setting. In addition, the policy revisions provided for additional options relating to the protection and treatment of both victims and offenders.

In 2005, the spousal assault rate rose 8% to 2.4 spousal assaults per 1,000 population.

Spousal Assault in 2005

In 2005, there were 10,273 incidents of spousal assault reported in British Columbia, a 9% increase from the 9,417 reported in 2004. The spousal assault rate in 2005 rose 8% to 2.4 spousal assaults per 1,000 population.

Spousal assault offences fall into three categories: incidents where the offender is male, incidents where the offender is female and incidents where both spouses are involved. In 2005, 74% (7,605) of spousal assault incidents involved a male offender, 16% (1,623) involved a female offender and 10% (1,045) involved both spouses assaulting each other. These proportions have remained relatively constant since 1995.

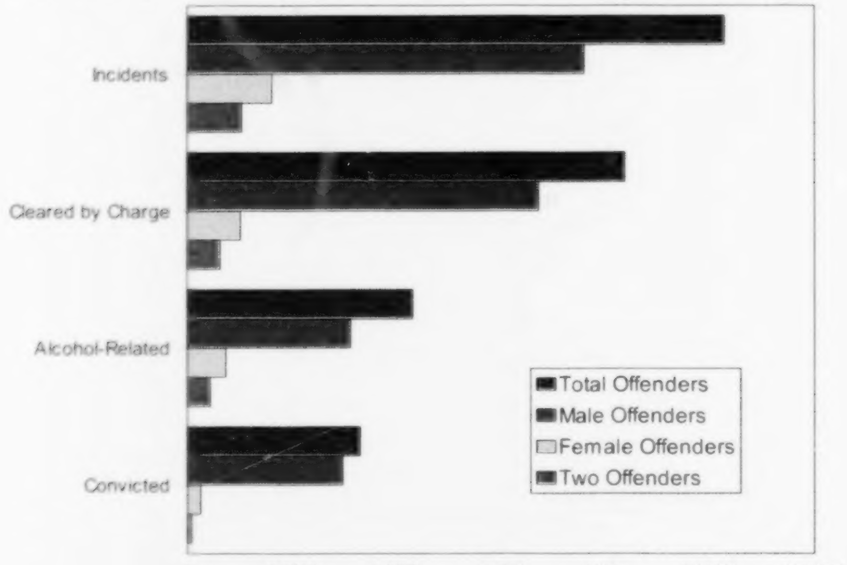
Spousal assaults are primarily a subset of non-sexual assault offences. In 2005, Criminal Code assault offences associated with spousal assault incidents accounted for 26% (11,094) of all assaults.

Although the majority of spousal assaults in 2005 involved the offence of non-sexual assault, there were 379 Criminal Code offences such as homicide, robbery, theft, and break and enter which also occurred in the context of a spousal assault.

Slightly less than 90% of the 11,473 Criminal Code offences reported within spousal assault incidents were cleared during 2005, 73% (8,254) were cleared by charge and 14% (1,559) were cleared by other means. Of the 8,254 persons charged, 78% (6,437) were charged in incidents where the offender was male, 12% (1,021) were charged in incidents where the offender was female, and 10% (796) were charged in incidents involving both spouses. Over 40% (4,323) of spousal assault incidents were alcohol-related.

In 2005, spousal assaults accounted for 26% of total reported assaults.

Figure 14: Spousal Assaults Reported to Police, 2005.



Spousal Assault Trends

From 1996 to 2005, the total number of reported spousal assault incidents fluctuated from a low of 9,077 reported in 2002 to a high of 10,273 in 2005. The spousal assault rate (number of spousal assaults per 1,000 population) remained relatively stable during the same period, averaging approximately 2.4 spousal assaults per 1,000 population.

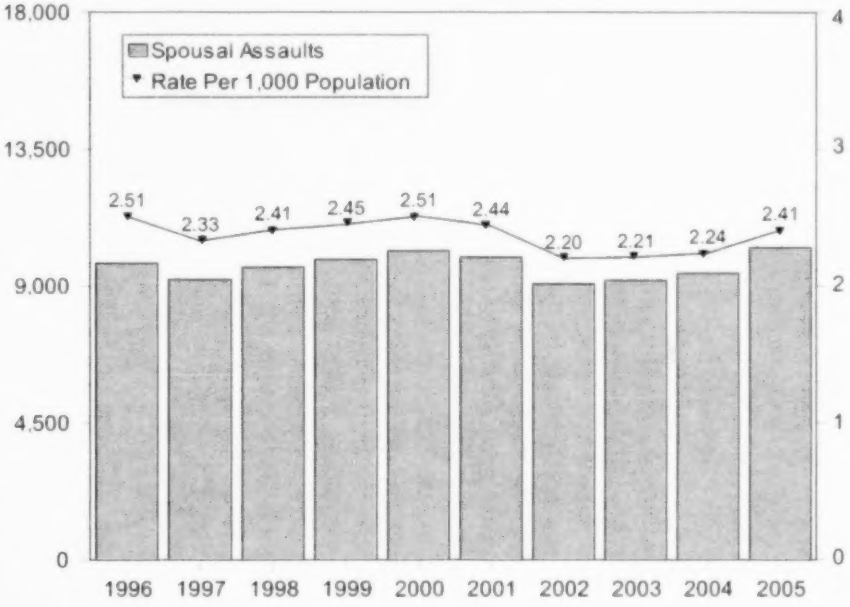
The percentage of Criminal Code offences occurring within spousal assault incidents which are cleared (either by charge or by other means), remained steady at approximately 90% during the last ten years. The percentage of these crimes cleared by charge also remained stable, averaging approximately 75% annually.

In 2005, the percentage of offences cleared by charge was considerably higher for assaults occurring within spousal assault incidents (73% or 8,070 offences cleared by charge) compared to assaults occurring within non-spousal incidents (23% or 7,398 offences cleared by charge). This trend has also been apparent during the past ten years. Overall, these data indicate that the police are recommending charges in cases involving violence in relationships.

There was also an overall increase in the number of persons charged in connection with spousal assault incidents during the past ten years. From 1996 to 2005, total persons charged rose from 7,372 to 8,354, an increase of 13%.

The number of spousal assaults in which alcohol use was a factor has remained consistent at or close to 50% between 1996 and 2005.

Figure 15: Number and Rate of Spousal Assaults, 1996 to 2005.



In 2005, over 40% of spousal assaults were alcohol-related.

Spousal Assault Survey Results

Police Services Division conducted a survey of spousal assaults reported to police during 1995. The findings of this survey are available in full from Police Services Division's Survey of Spousal Assaults Reported to Police in 1995 in British Columbia. The survey revealed the following characteristics of a "typical" spousal assault in B.C.:

- The victim is female and is most likely between the ages of 25 and 35.
- The accused is male and similarly, is most likely between the ages of 25 and 35.
- The victim and accused are in a common-law relationship and the offence occurs in a home shared by the victim and accused.
- More than half of the incidents involve alcohol.
- More than two-thirds of the accused charged have a prior criminal record and half of those records are for a previous violent offence.

- Three-quarters of the incidents are cleared by charge by the police and Crown counsel approves nearly all these incidents. More than half of the incidents proceed on a single charge and that charge is most likely a level 1 assault (assault that does not involve a weapon or serious bodily harm).
- In approximately half of the incidents proceeded with by Crown, the accused is convicted of at least one criminal offence.
- Of those charges that result in conviction, the offender is likely to receive a suspended sentence with probation, be incarcerated for a period of one to six months, or be put on probation (with or without a fine).
- In the remaining incidents proceeded with by Crown, the accused is not convicted. For those charges that end in a non-conviction, charges are most frequently stayed (with or without a recognizance).

Notably, many findings of Police Services Division's survey of spousal assaults parallel those reported in the 1998 Canadian Centre for Justice Statistics report, Family Violence in Canada: A Statistical Profile.

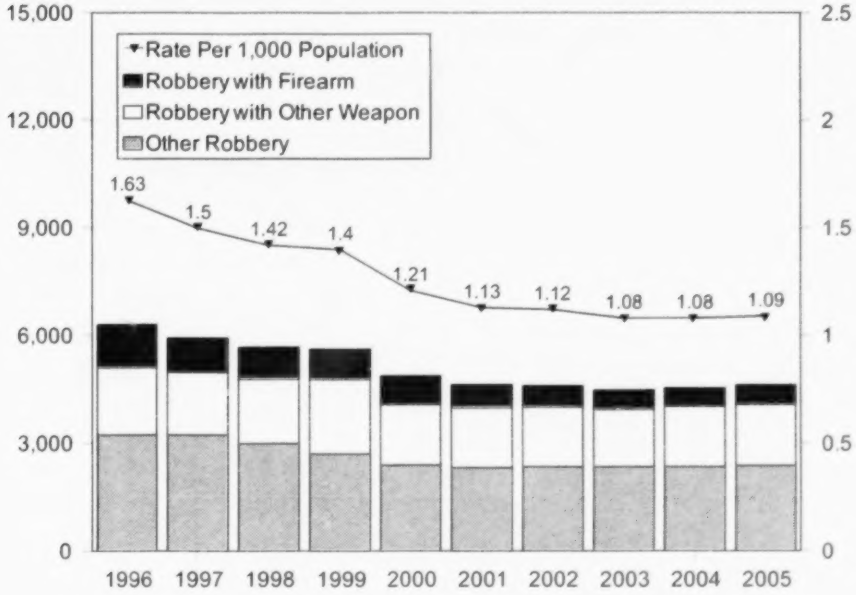
Trends in data indicate that the police are recommending charges in cases involving violence in relationships.

Robbery

Robbery offences are divided into three categories: robbery with a firearm, robbery with another weapon and other robbery. Other robbery includes assault with intent to steal (mugging) and stopping a mail conveyance with the intent to rob or search it.

Unlike other violent crimes in which an offence is counted for every victim, only one robbery offence is counted per incident regardless of the number of victims in that incident.

Figure 16: Number and Rate of Robbery Offences, 1996 to 2005.



In 2005, there were 4,619 robberies reported, an increase of 2% from 2004.

After remaining relatively constant throughout the 1980s, the number of robberies increased steadily in the early 1990s to a 20-year high of 6,304 offences in 1996. Between 1997 and 2003, the number of robberies reported consistently declined. In both 2004 and 2005, the number of robberies increased slightly by 1% (4,538 offences) and 2% (4,619 offences) respectively. Despite these recent increases, the rate of robberies remained relatively constant at slightly above one offence per 1,000 population for the past three years. In 2005, the robbery rate was 1.09 offences per 1,000 population.

In 2005, 51% (2,378) of robbery offences were classified as other robbery, compared with 37% (1,696) as robbery with a weapon other than a firearm, and 12% (545) as robbery with a firearm.

In 2005, 31% (1,436) of robberies were cleared (solved), 29% (1,319) by charge and a 3% (117) by other means.

Adults comprised 84% (1,339), and young offenders accounted for 16% (247), of the 1,586 persons charged with robbery in 2005. Adult and youth males represented 89% (1,406) of the total persons charged with robbery.

Robbery Survey Results

In 1996, Police Services Division conducted a survey of robbery offences in British Columbia, the results of which were released in B.C. Crime Trends Newsletter, Issue #3 (March 2000). The survey revealed the following characteristics of a "typical" robbery in B.C.:

- One-third of robberies occurred on a street, road or highway. An additional 9% occurred in other outdoor areas including parks, school grounds and parking lots. Approximately 8% of the robberies occurred at convenience stores, 8% in homes, 7% at banks, and 6% at gas stations.
- Two-thirds of the surveyed victims were male and one-third were female.
- Approximately 27% of the victims were between the ages of 11 and 20 years while another 21% were between the ages of 21 and 30 years.
- A lone victim was involved in eight out of ten incidents.
- Physical force was used in 56% of the robberies while threats of violence were used in another 32% of incidents.
- In approximately half of the incidents a weapon was used during the robbery. Of these incidents, 41% of the weapons were knives and 27% were firearms.
- In eight out of ten surveyed robberies the accused was male. Youths (between the ages of 12 and 17 years) were identified as accused persons in 30% of the robberies while an additional 32% of the accused were between the ages of 18 and 25 years. Half of the robberies involved a lone accused, while another 28% involved two accused persons.
- Of the surveyed incidents, approximately one-third were cleared by charge (solved) and the remaining two-thirds were not cleared (unsolved). An accused was not identified in almost all of the incidents that remained unsolved.

In 2005, males represented almost 90% of persons charged with robbery.

Abduction

There are four separate categories of abduction, each of which refers to the removal of a child from the parent or guardian's care. These offences are different from the offence of kidnapping, which refers specifically to the forcible removal or confinement of a person regardless of age or relationship. Abduction is characterized by behaviours such as unlawfully taking, enticing away, harbouring, or concealing a young person.

The current laws regarding abduction were enacted in 1983. They replaced sections of the Criminal Code that were only applicable to the abduction of females under a specific age.

The four categories of abduction are as follows: abduction of an unmarried person under the age of 16 against the will of a parent or guardian; abduction of a person under the age of 14 with the intent of depriving the parent or guardian of possession of the child; abduction by a parent or guardian of anyone under the age of 14 in contravention of a custody order, with the intent to deprive the person with legal custody of having custody of the child; and abduction of a person less than 14 years of age by a parent or guardian where there is no custody order, with the intent to deprive the other parent of the child.

In 2005, there were 112 abduction offences, 13% less than the ten-year high of 128 abductions reported in 2004. Of these 112 abductions, 45% (50) were abductions of children under the age of 14, 28% (32) were abductions in contravention of a custody order, 15% (17) were abductions of persons under the age of 16, and the remaining 12% (13) were abductions of a child under 14 (without a custody order).

In 2005, 35% (39) of abductions were cleared (solved), 27% (30) by charge and 8% (9) by other means. Of the 31 offenders charged with abduction in 2005, 65% (20) were male, and 35% (11) were female. Of the males charged, three of them were male youths aged 12 to 17 years.

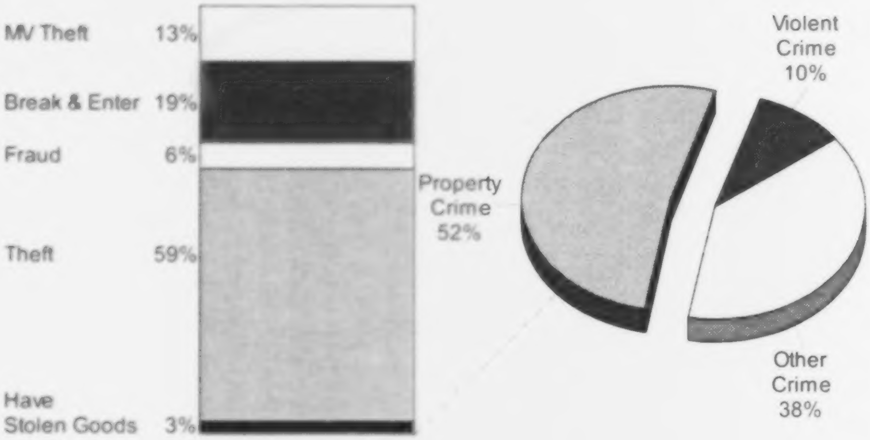
In 2005, there were 112 abductions, 13% less than the ten-year high of 128 abductions reported in 2004.

Other Crimes Against Persons

There are other Criminal Code offences that are not included in the violent crime category, but may constitute a crime against another person (as opposed to property). The most evident of these offences is criminal harassment. Within the federally prescribed method of coding criminal offences for the UCR Survey, criminal harassment crimes are included in the "other" crime category. Consequently, criminal harassment is discussed in more detail in Chapter 4.

Property Crime in British Columbia

Figure 17: Property Crime by Category, 2005.



Property crimes represented 52% (265,246) of all Criminal Code offences reported in British Columbia during 2005. These crimes include break and enter, motor vehicle theft, other theft (such as shoplifting, theft of bicycles, theft from motor vehicles) as well as fraud and possession of stolen property. Because one out of two reported crimes are property offences, these offences have a greater impact on B.C.'s crime trends than other types of crime.

Property Crime in 2005

In 2005, police reported 265,246 property crimes, a decrease of 6% when compared with the 283,356 offences reported in 2004. The 2005 property crime rate was 62.3 property crimes per 1,000 population, 8% lower than in 2004.

Most property crimes are either thefts or break and enter offences. In 2005, there were 158,701 reported thefts and 49,611 break and enter offences. These two offence categories together represented almost 80% of all property crimes and 41% of total Criminal Code offences.

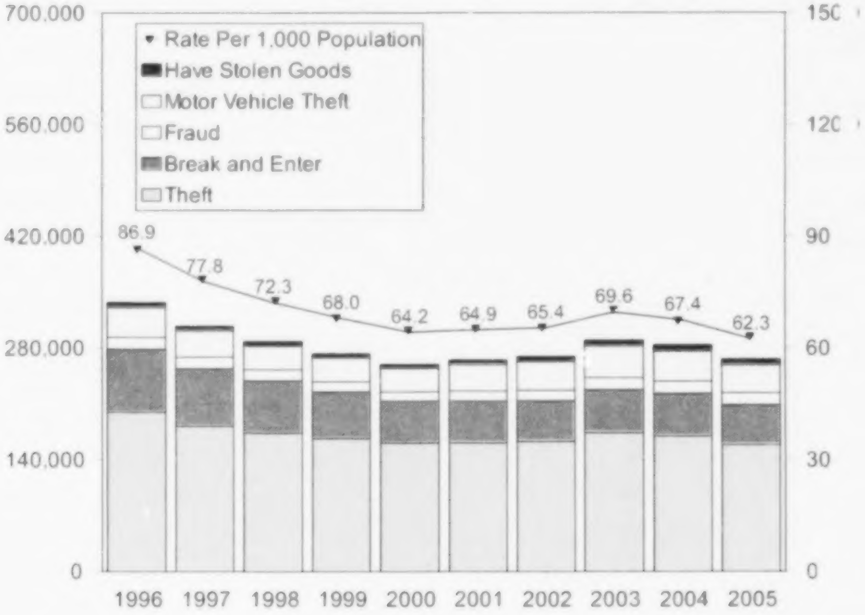
In 2005, 21,766 persons were charged with property crimes. Approximately 89% (19,444) were adults and 11% (2,322) were youths. Males represented 76% (16,604) of persons charged and females represented 24% (5,162). These percentages have remained about the same over the last ten years.

Property Crime Trends

After remaining fairly stable during the 1980s, the number of property crimes in B.C. began increasing in 1990 and peaked at 336,746 offences reported in 1996. Starting in 1997, the number of property crimes decreased over the next four years, falling by an average of 6% each year. Between 2000 and 2004, the number of property crimes rose again by a total of 9%. In 2005, however, the number of property crimes decreased by 18,110 offences or 6%, from 283,356 offences reported in 2004 to 265,246. Notably, the number of property crimes reported in 2005 is 21% lower than 20 year high reported in 1996.

The number of offences cleared (solved) is low for most property crimes. In 2005 only 13% of property crimes were cleared.

Figure 18: Number and Rate of Property Offences, 1996 to 2005.



The property crime rate also remained relatively constant throughout the 1980s, averaging about 80 offences per 1,000 population. The property crime rate rose through the 1990s, peaked in 1996, and declined each subsequent year until 2003. Similar to the number of offences, the property crime rate increased between 2000 and 2003 by 9%. In 2005, the property crime rate was 62.3 offences per 1,000 population, an 8% decrease from the 67.4 offences reported in 2004, and a 28% decrease from the 1996 rate of 86.9.

The number of offences cleared (solved) is low for most property crimes. From 1995 through 1999 the percentage of property crimes cleared remained stable at 17%. Since 1999, the percentage of property offences cleared declined, and in 2003 stabilized at 13%. In 2005, there were 34,270 property crime offences cleared, representing a 13% clearance rate.

Break and Enter

Break and enter offences are divided into three categories: residential, business, and other break and enters. Other break and enter offences include the break and enter of trains, boxcars, unattached trailers or storage lockers.

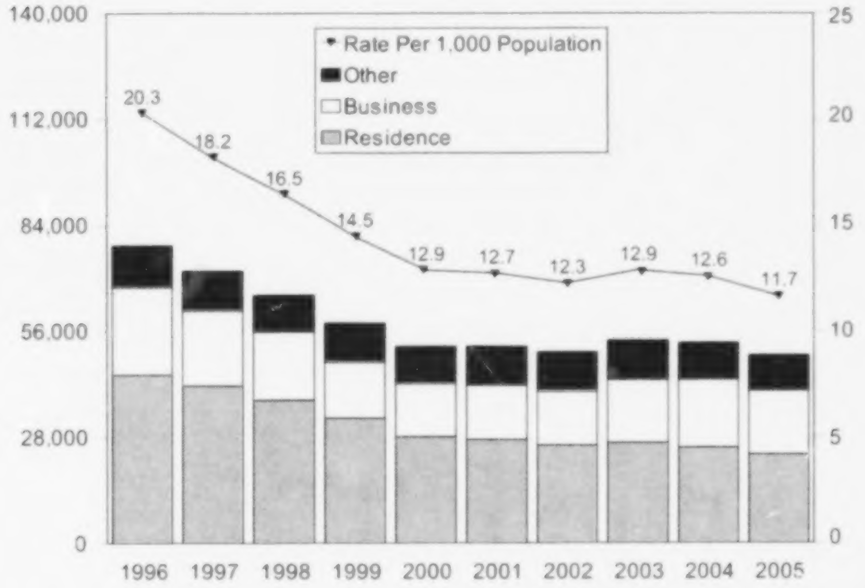
Break and Enter in 2005

In 2005, police reported 49,611 break and enter offences, a decrease of 3,273 offences or 6% from the 52,884 reported in 2004. The 2005 break and enter rate was 11.7 offences per 1,000 population, 7% lower than in 2004.

During 2005, 47% (23,400) of break and enter offences occurred in homes, 34% (16,856) in businesses, and 19% (9,355) in other premises. Break and enter offences accounted for 19% of all property crime and 10% of total Criminal Code offences.

In 2005, the number of break and enter crimes decreased by 6% while the break and enter rate decreased by 7%.

Figure 19: Number and Rate of Break and Enter Offences, 1996 to 2005.



In 2005, 72% (2,330) of the 3,252 persons charged with breaking and entering were male adults, 9% (280) were female adults, 18% (571) were male youths, and the remaining 2% (71) were female youths.

Break and Enter Trends

In 1996, the number of break and enter offences reached a 20-year high of 78,604 offences; however, since that time the number and rate of offences has generally decreased. In 2005, there were 49,611 break and enter offences reported, a 6% decrease from the 52,884 offences reported in 2004.

The rate of break and enter offences was stable at 20 offences per 1,000 population between 1990 and 1996. From 1997 to 2000, the rate decreased an average of 10% per year and remained relatively stable over the next five years at an average of 12.7 offences per 1,000 population. In 2005, the break and enter rate declined to 11.7, a decrease of 7% from the 2004 rate of 12.6 offences per 1,000 population.

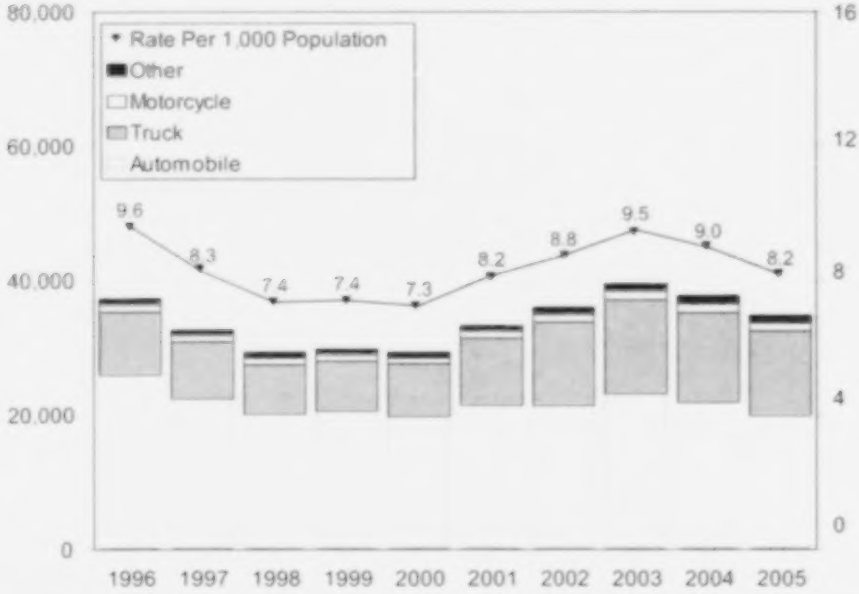
The clearance (solved) rate for break and enter offences averaged approximately 9% over the past ten years. The clearance rate for break and enter offences during 2005 was 8% (3,828).

Motor Vehicle Theft

The RCMP and Lower Mainland municipal police departments have a joint task force to combat auto crime.

Motor vehicle theft data include theft or attempted theft of automobiles, trucks, motorcycles and other vehicles (such as snowmobiles, farming and industrial implements, and all terrain vehicles). Most stolen vehicles are cars or trucks.

Figure 20: Number and Rate of Motor Vehicle Thefts, 1996 to 2005.



In 1998, police officers from the RCMP and Lower Mainland municipal police departments began work on the Integrated Municipal Provincial Auto Crime Team (IMPACT). IMPACT's priorities include: targeting offenders who are stealing vehicles for thrill seeking purposes; crimes in which vehicles are stolen and disposed of offshore or in other parts of Canada, or taken to "chop shops" for dismantling; and crimes in which vehicles are stolen and then used in the commission of further criminal offences.

Motor Vehicle Theft in 2005

There were 34,800 motor vehicle thefts reported in 2005, representing a decline of 2,955 offences or 8% from 2004. Of the 37,800 motor vehicle thefts reported in 2005, 57% (19,916) were cars, 36% (12,574) were trucks and the remaining 7% (2,310) were motorcycles or other vehicles. In 2005, the motor vehicle theft rate was 8.2 offences per 1,000 population, a 9% decrease from the 2004 motor vehicle theft rate of 9.0 offences.

Approximately 5% (1,763) of motor vehicle thefts were cleared (solved) in 2005. Of the 1,450 persons charged with motor vehicle theft in 2005, 68% (986) were male adults, 12% (168) were female adults, 17% (250) were male youths, and the remaining 3% (46) were female youths.

Adults accounted for 80% (1,154) of persons charged with this type of offence while youths represented 20% (296).

Motor Vehicle Theft Trends

Similar to other types of property crime, the number of motor vehicle thefts remained fairly constant during the 1980s until 1990. Aside from a substantial increase in 1996, motor vehicle thefts averaged approximately 30,000 offences annually between 1995 and 2000. The number of reported motor vehicle thefts then steadily increased, reaching a ten-year high of 39,491 offences in 2003. In the past two years, however, the number of motor vehicle thefts reported declined by 4% and 8% respectively.

The rate of motor vehicle thefts remained relatively constant in 1994 and 1995, and from 1998 to 2000. Peaks in the motor vehicle theft rate occurred in 1996 (9.6 offences per 1,000 population) and 2003 (9.5 offences per 1,000 population). In 2005, the motor vehicle theft rate decreased 9% to 8.2 offences per 1,000 population.

The clearance (solved) rate for motor vehicle theft decreased over the past ten years from 8% in 1996 to 5% in 2005. Although the clearance rate is low, about 95% of stolen vehicles are recovered. Many of these vehicles are damaged by the offender breaking into the vehicle, driving carelessly, or removing parts for resale.

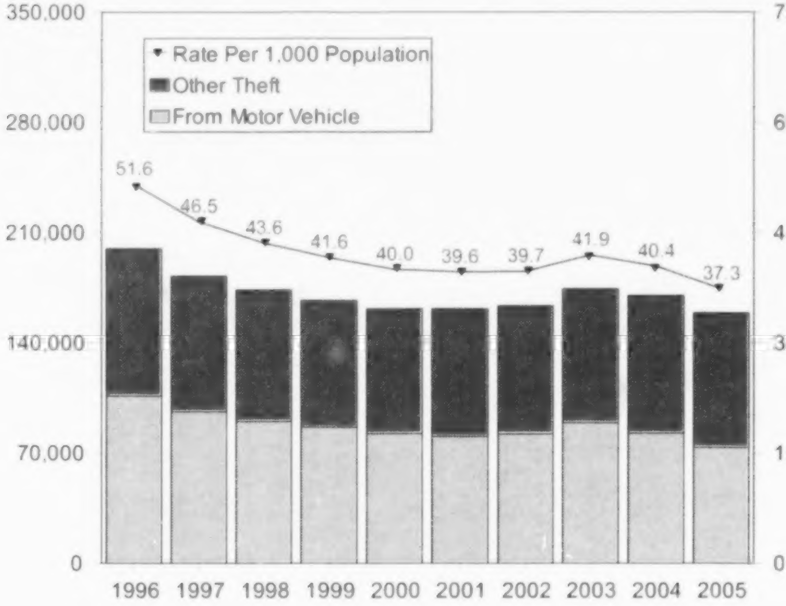
In 2005, the motor vehicle theft rate decreased by 9%.

Theft

Theft, including attempted theft, is divided into two major categories: theft from motor vehicle and other theft. Other theft includes offences such as theft of electricity or gas, theft of data or computer software, illegal use of pay-TV descramblers and computer-aided long-distance calls. As of 2004, other theft also included theft of bicycles and shoplifting. Theft accounts for three out of five property crimes and one out of three Criminal Code offences.

Every theft is classified according to the value of the goods stolen. From 1986 to 1994, thefts were divided into over and under $1,000 categories. In 1995, these categories were revised to theft over and under $5,000. Since 1995, the theft under $5,000 category has represented approximately 98% of total theft offences. This section describes the data concerning theft but does not distinguish between the over and under $5,000 theft categories.

Figure 21: Number and Rate of Thefts, 1996 to 2005.



Theft accounts for 60% of property crime, and 31% of all Criminal Code offences.

Theft in 2005

In 2005, there were 158,701 thefts reported by the police. This represented a 7% decrease from the 169,818 thefts reported in 2004. As in previous years, thefts from motor vehicles (73,559) accounted for slightly less than half of all thefts.

In 2005, the theft rate per 1,000 population was 37.3 offences, an 8% decrease from the 2004 rate of 41.9 offences.

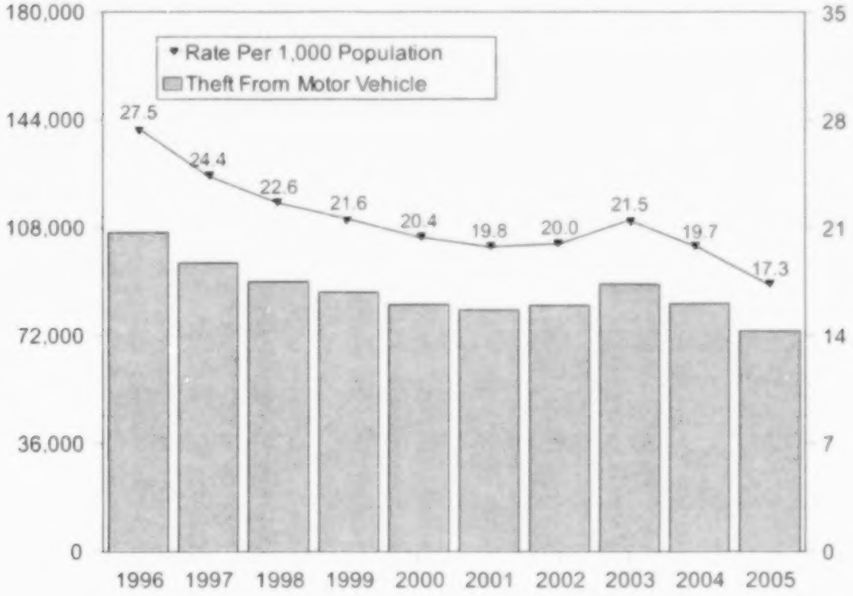
Approximately 13% (20,471) of thefts were cleared (solved) in 2005, 7% (11,119) by charge and 6% (9,352) by other means.

Of the 11,795 persons charged with theft in 2005, 66% (7,841) were male adults, 25% (2,912) were female adults, 5% (622) were male youths and 4% (420) were female youths.

Theft Trends

Like other property crimes, the number of thefts remained stable through the 1980s then rose steeply in the early 1990s, peaking at almost 200,000 reported offences in 1996. From 1996 to 2000, however, the number of thefts declined an average of 5% per year and remained relatively stable from 2000 to 2002 averaging approximately 162,000 offences per year. Similar to other offences categories, the number of thefts increased in 2003 by 7% to 174,090 reported offences. In spite of the 2003 increase, the overall ten-year trend in thefts is decreasing. In 2005, the 158,701 thefts reported (a 7% decrease from 2004) represented the lowest number of thefts reported in over a decade.

Figure 22: Number and Rate of Thefts From Motor Vehicles, 1996 to 2005.



Thefts from motor vehicle historically represent almost 50% of all reported thefts.

As noted, thefts from motor vehicles generally represent 50% of all thefts and are a major driver of overall theft trends. For example, in 2005, there were 73,559 reported thefts from a motor vehicle, a decrease of 11% from 2004. This substantial decrease in thefts from motor vehicle largely contributed to the 7% decrease in the overall theft category.

The theft clearance (solved) rate has remained relatively stable over the past decade ranging from a clearance rate of 16% in 1996 through 1999 and decreasing to 13% in 2003 through 2005.

The number of persons charged with theft decreased steadily over the past ten years. There were 22,436 people charged with theft in 1996 while only 11,794 persons were charged with theft in 2005.

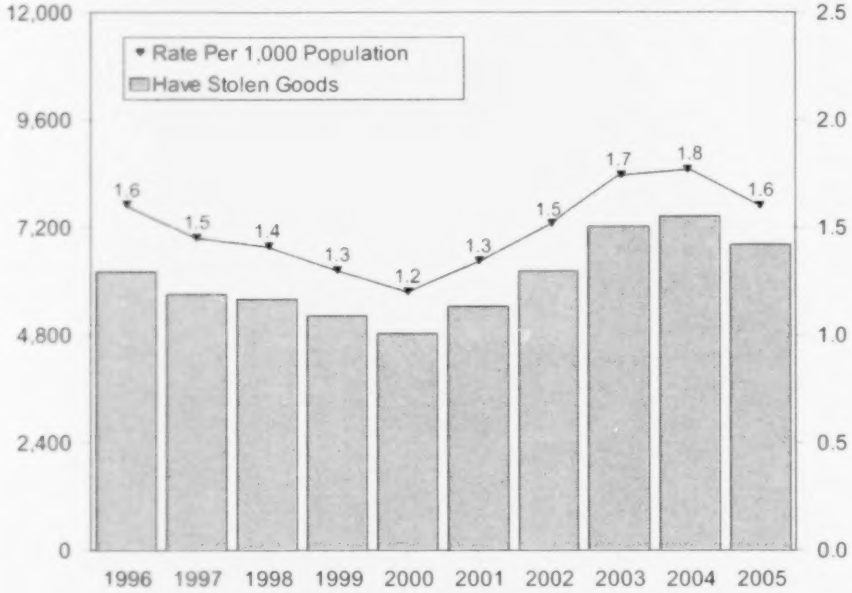
Have Stolen Goods

Between 1995 and 2000, possession of stolen property offences declined by 23% overall. Subsequently, from 2000 to 2004, the number of offences increased by 54% overall. A total of 6,819 "have stolen goods" (also known as possession of stolen property) offences were reported in 2005, a decrease of 633 offences or 8% from the 7,452 offences reported in 2004.

In 2005, the rate of possession of stolen property offences per 1,000 population was 1.6, a decrease of 11% from the 2004 rate of 1.8 offences. Over the past decade, the possession of stolen property rate never exceeded 2 offences per 1,000 population, averaging slightly less than 1.5 offences per 1,000 population.

Over the past decade, an average of 76% of have stolen goods offences were cleared by police.

Figure 23: Number and Rate of Have Stolen Goods, 1996 to 2005.



Due to the nature of these offences, clearance rates are high. Over the last ten years, an average of 76% of possession of stolen property offences were cleared. In 2005, 70% (4,789) of possession of stolen property offences were cleared, 48% (3,260) by charge and 22% (1,529) by other means.

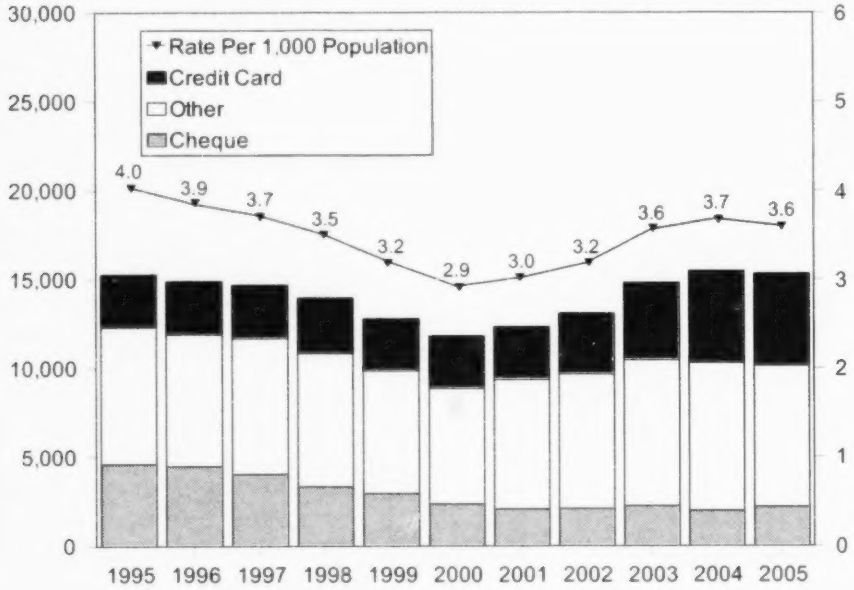
Of the 3,365 persons charged with possession of stolen property in 2005, 82% (2,747) were males and 92% (3,079) were adults.

Fraud

Fraud offences are reported under three categories: cheque, credit card and other fraud. Other fraud includes offences such as criminal breach of trust, real estate fraud, and forgery.

Between 1995 and 2000, the number of fraud offences steadily declined; however, the number of fraud offences reported rose each subsequent year until 2005. There were 15,315 fraud offences reported in 2005, a decrease of 1% from the 15,447 offences reported in 2004.

Figure 24: Number and Rate of Fraud Offences, 1996 to 2005.



There were 15,315 frauds reported in 2005, a 30% increase from 2000.

In 2005, the rate of fraud offences per 1,000 population was 3.6, a decrease of 2% from the 2004 rate of 3.7 offences. For the past ten years, the fraud rate averaged slightly less than 4 offences per 1,000 population.

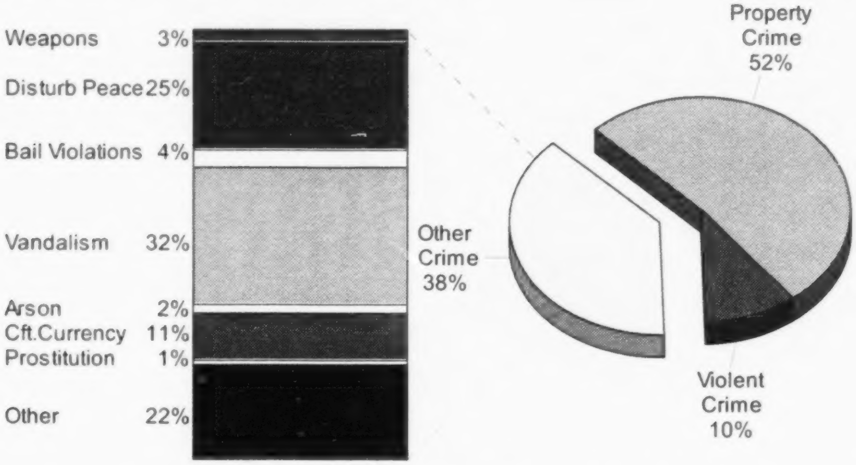
Historically, clearance rates were relatively high for this type of offence, averaging 54% between 1995 and 1999. However since that time, clearance rates for fraud steadily decreased. In 2005, 22% (3,419) of fraud offences were cleared (solved), 14% (2,091) by charge while 9% (1,328) by other means.

Of the 1,904 persons charged with fraud in 2005, 64% (1,226) were male adults, 33% (622) were female adults, 2% (31) were male youths and 1% (25) were female youths.

Other Crime in British Columbia

CHAPTER 4

Figure 25: Other Crime by Category, 2005.



Approximately 38% of all Criminal Code offences fell within the category of "other" crime in 2005. These other crimes include mischief and property damage (vandalism), disturbing the peace, counterfeit currency, bail violations, possession of offensive weapons, arson, prostitution, criminal harassment, and miscellaneous other Criminal Code offences (a catch-all category of offences for which specific data collection codes do not exist).

In 2005, there were 191,354 other crimes reported, a 1% decrease from the 193,367 reported in 2004.

From 1993 to 1999, the number of reported other crimes steadily declined by an average of 3% per year. Between 1999 and 2004, however, the number of reported other crimes increased by 34% from 142,957 in 1999 to 191,517 in 2004. The first decrease in the number of other crimes reported during the past six years occurred in 2005.

Of the other crimes reported in 2005, 32% (61,727) were vandalism offences, while another 25% (48,667) were disturb the peace offences. Together these offences represent almost 60% of reported other crimes.

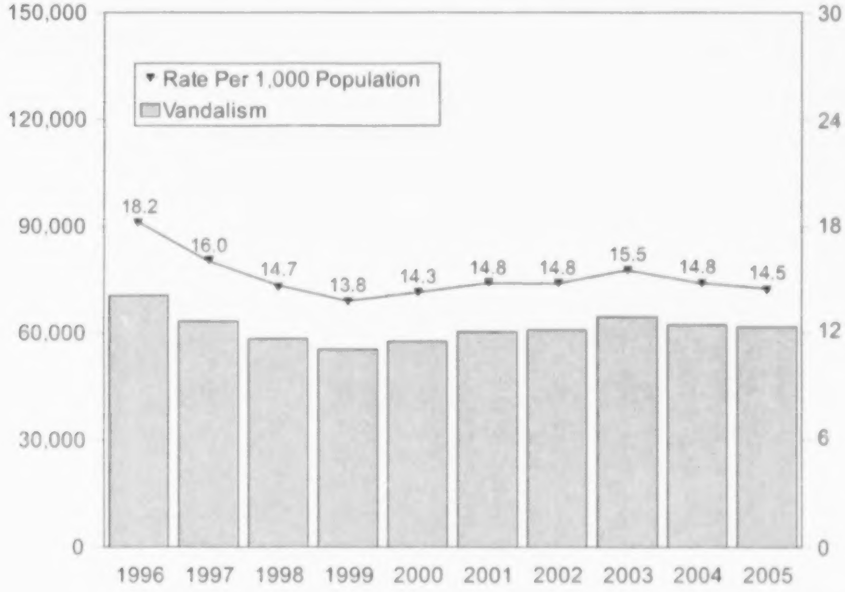
In 2005, the other crime rate per 1,000 population was 45, a decrease of 2% from the 2004 other crime rate of 46. After decreasing an average of 2% per year between 1995 and 1999, the other crime rate increased approximately 28% between 1999 and 2004. This increase in the volume of other crimes was largely driven by substantial rises in the number of counterfeit currency and disturb the peace offences.

The clearance (solved) rate for other offences was 26% (50,713) in 2005, similar to the clearance rate reported in 2004. Clearance rates for other crimes are largely influenced by the volume of mischief and property damage offences which traditionally have low clearance rates.

Of the 17,649 persons charged with other crimes during 2005, 89% (15,721) were adults and 11% (1,928) were youths. Males represented 85% (14,948) of persons charged.

In 2005, there were 191,354 other crimes, a 1% decrease from the 193,367 other offences reported in 2004.

Figure 26: Number and Rate of Vandalism Offences, 1996 to 2005.



Mischief and Property Damage (Vandalism)

The offence of mischief and property damage is often called vandalism. It includes incidents where property is destroyed or damaged, acts where property is rendered dangerous or inoperative, or acts that render access to property denied or obstructed. Similar to thefts, mischief and property damage offences are classified according to their value. From 1986 to 1994, mischief and property damage offences were divided into over and under $1,000 categories. In 1995, these categories were revised to over and under $5,000. Since the 1995 revisions, most offences in this category have been reported as mischief and property damage under $5,000.

This section describes the data concerning mischief and property damage but does not distinguish between the over and under $5,000 categories.

In 2005, a total of 61,727 mischief and property damage offences were reported, representing a 1% decrease from the 62,294 offences reported in 2004.

Between 1996 and 1999, the number of reported mischief and property damage offences steadily declined by an average of 8% per year. Subsequent to these declines, the number of offences reported increased 12% during the following four year period, from 57,622 reported in 2000 to 64,551 in 2003. From 2004 onward, however, the number of mischief and property damage offences reported decreased an average of 2% annually.

Over the past decade, the mischief and property damage rate fluctuated from a high of 18.2 offences per 1,000 population in 1996 to a low of 13.8 in 1999. In 2005, the mischief and property damage rate was 14.5, a 2% decrease from the 2004 rate of 14.8 offences per 1,000 population.

Clearance rates are low for this type of offence, fluctuating between 14% and 10% over the past decade. Approximately 10% (6,050) of mischief and property damage offences were cleared (solved) in 2005, 3% (1,713) by charge and 7% (4,337) by other means.

Of the 1,835 persons charged with mischief and property damage crimes in 2005, 75% (1,379) were adults and 25% (456) were youths. Males represented 87% (1,596) of persons charged.

In 2005, mischief and property damage offences represented 12% of total Criminal Code offences reported by police, a decrease from 1994 when these offences accounted for almost 20% of Criminal Code reporting.

Prostitution

Prostitution offences are classified into three categories: keeping a bawdy house, procuring, and other prostitution offences. The offence of keeping a bawdy house occurs when premises are used for prostitution. Procuring, commonly called pimping, is the offence of enlisting or attracting, by any means, a person to engage in prostitution. Other prostitution offences include incidents in which a person stops or communicates with another person in a public place for the purposes of prostitution.

In 2005, there were 1,801 reported prostitution offences, a decrease of 12% from the 2,047 prostitution offences reported in 2004. Approximately 94% (1,688) of these crimes were for other prostitution offences, 5% (92) were for procuring and the remaining 1% (21) for keeping a bawdy house.

Three out of four prostitution offences were reported in core urban areas, specifically Vancouver, Nanaimo, Surrey, Prince George and Kelowna.

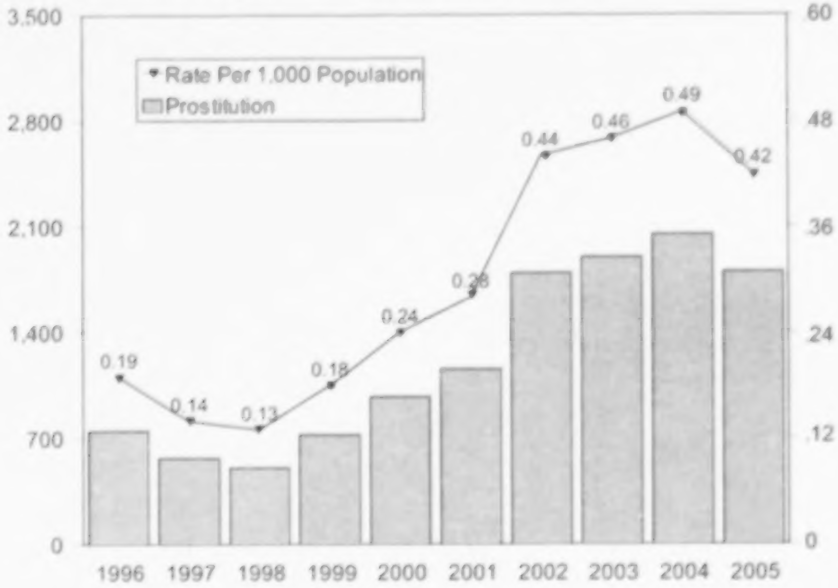
In 2005, as in previous years, the prostitution rate was less than 1 offence per 1,000 population. From 1996 to 2005, the prostitution rate has fluctuated, ranging from a high of 0.49 in 2004 to a low of 0.13 in 1998.

Traditionally, clearance rates for prostitution offences have been high. However, from 1996 to 2002, clearance rates declined steadily, from 88% to 49% respectively, and have fluctuated in the past few years. In 2005, 58% (1,040) of prostitution offences were cleared.

Changes in reported prostitution offences are highly sensitive to changes in police enforcement practices.

In 2005, 475 persons were charged with prostitution offences, 34% more than in 2004. Male adults accounted for 36% (173) of persons charged, while female adults accounted for 63% (294).

Figure 27: Number of Prostitution Offences, 1996 to 2005.



In 2005, there were 5,369 weapons offences reported, an increase of 6% from 2004.

With the introduction of Bill C-49 (covering public communication for the purposes of prostitution) in 1986, the number of prostitution offences increased substantially over previous years. The number of offences peaked in 1991 and 1992, when 1,700 offences were reported in each of these years, and then declined to a low of 503 offences reported in 1994. In 1995, the number of prostitution offences more than doubled compared with 1994, but then decreased by 47% in 1996, and decreased by an additional 33% between 1996 and 1998. Between 1999 and 2004, however, the number of prostitution offences steadily increased each year and then dropped again in 2005. It is important to stress that changes in prostitution offences are highly sensitive to changes in police enforcement practices.

Offensive Weapons

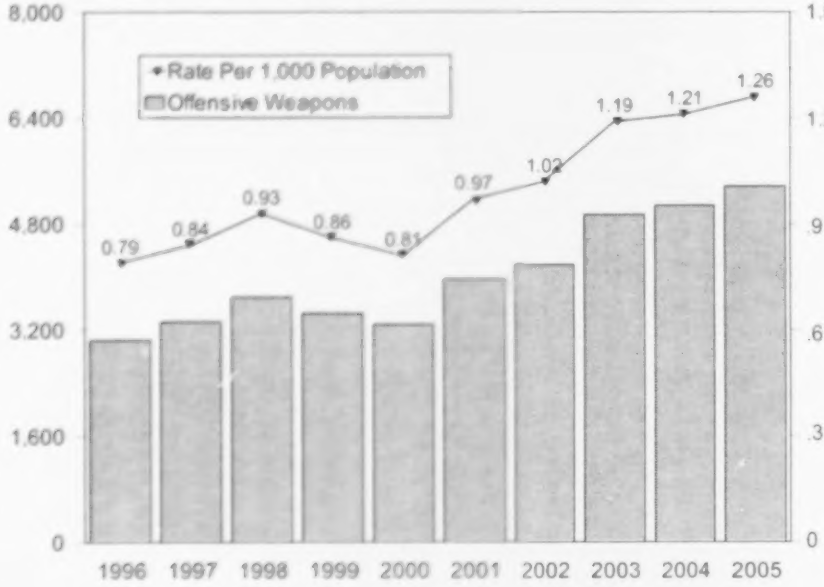
In 1998, the federal Firearms Act was proclaimed. The Act mandated the licensing of all gun owners by January 1, 2001 and the registration of all guns by January 1, 2003. The firearms registration requirements of the legislation were intended to provide a process through which illegal firearms could be identified and tracked. In addition, the Act set out licensing requirements for all firearms, including enhanced screening procedures, spousal notification, and safety training.

As a reflection of legislative changes, the offence categories for weapons have been modified. The new categories covered firearms usage, weapons possession, trafficking import/export and other weapons offences. Until 1999, offensive weapons crimes were divided into four offence categories: explosives, prohibited weapons, restricted weapons and other weapon offences. The revised categories are not comparable with the previous offence categories.

In 2005, there were 5,369 weapons offences reported, an increase of 6% from the 5,081 reported in 2004. Of these offences, 63% (3,398) were for weapons possession and 28% (1,485) were for "other" weapons offences. The remaining 9% (486) were related to firearms usage and weapons trafficking.

Although the number of weapons offences has increased an average of 9% per year from 2000 onward, the weapons rate has remained relatively stable near 1 offence per 1,000 population. In 2005, the rate was 1.26 offences per 1000 population.

Figure 28: Number of Weapons Offences, 1996 to 2005.



Clearance rates are relatively high for this type of offence. In 2005, 57% (3,036) of weapons offences were cleared, 26% (1,370) by charge and 31% (1,666) by other means.

Of the 1,483 persons charged with weapons offences in 2005, 81% (1,203) were adult males, 6% (90) were adult females, 12% (178) were male youths, and 1% (12) were female youths.

Clearance rates for weapons offences are relatively high. In 2005, 57% of these types of offences were cleared by police.

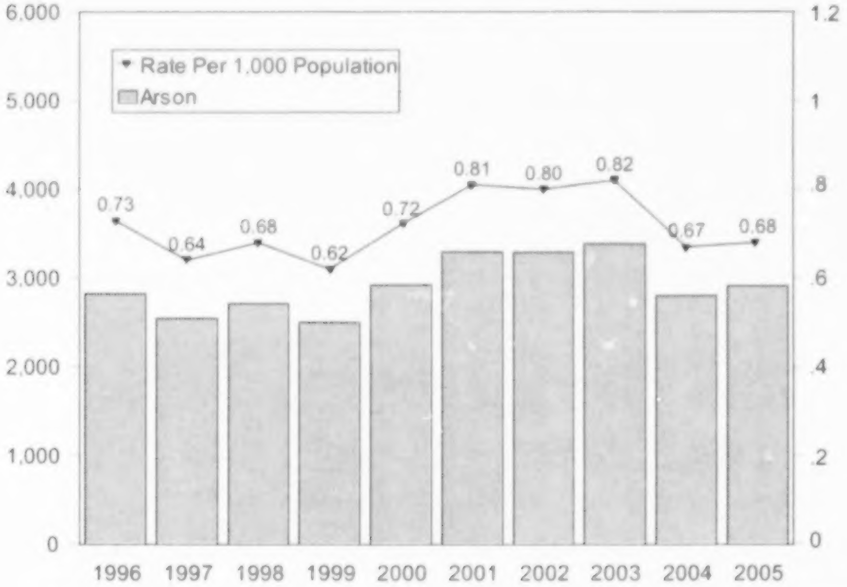
Arson

Before 1990, arson was more narrowly defined than it is today. With the proclamation of Bill C-53 in July 1990, the definition of arson was expanded and the penalties became more serious. Besides causing damage to specific types of property, arson now includes wilful disregard for the lives and safety of others and negligent conduct that results in fires or explosions. It also criminalizes the possession of flammable or incendiary materials.

Mischief arson, such as setting fire to abandoned cars or waste receptacles, was previously reported as mischief and property damage. Under the new legislation, these offences are now reported as arson. This resulted in a significant increase in the number of arson offences recorded since 1990.

In 2005, 2,912 arson offences were reported, a 4% increase from 2004.

Figure 29: Number and Rate of Arson Offences, 1996 to 2005.



Over the past decade the number of reported arson offences has fluctuated, ranging from a low of 2,502 reported in 1999 to a high of 3,386 recorded in 2003. In 2005, there were 2,912 arson offences reported by police, a 4% increase from the 2,802 reported in 2004.

Before 1991, approximately 20% of arson offences were cleared. Since that time, the average clearance rate has gradually declined. This decrease in clearance rates is largely due to the wider definition of arson. In 2005, 10% (279) of arson offences were cleared.

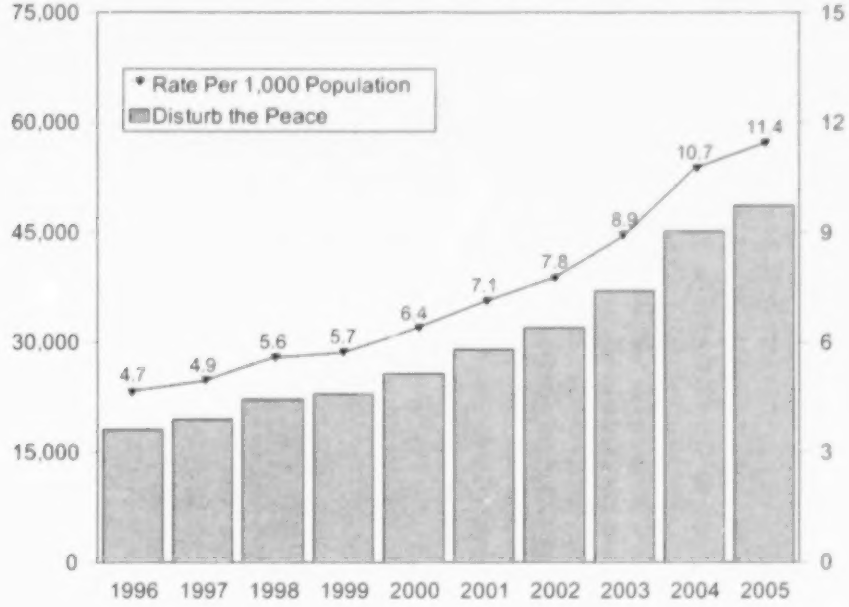
Of the 179 persons charged with arson offences in 2005, 58% (103) were adult males, 4% (8) were adult females, 37% (66) were male youths and the remaining 1% (2) were female youths.

Disturbing the Peace

Disturbing the peace is defined as causing a disturbance in or near a public place. A "disturbance" includes behaviour such as fighting, making loud noise, using obscene language, and being drunk and disorderly.

Rather than proceeding under the Criminal Code, police often deal with incidents of disturbing the peace as offences under provincial statutes or municipal bylaws. This allows police to address these crimes through the municipal and provincial ticketing process.

Figure 30: Number and Rate of Disturb the Peace Offences, 1996 to 2005.



Police often deal with incidents of disturbing the peace through the municipal and provincial ticketing process.

The trend of disturbing the peace offences has changed significantly during the past twenty years. Between 1984 and 1995, the number of reported offences remained stable, averaging approximately 15,000 offences per year. Over the past decade, however, the number of disturbing the peace offences has steadily increased each year. In 2005, there were 48,667 Criminal Code disturbing the peace offences reported, representing an increase of 8% from the 45,120 reported in 2004.

Similarly, the rate per 1,000 population for disturbing the peace offences remained relatively constant prior to 1997, never exceeding 5 offences per 1,000 population. Since then the rate has risen from 5.6 in 1998 to a ten year high of 11.4 in 2005.

In 2005, 31% (15,290) of disturbing the peace offences were cleared. Of the 873 persons charged with disturbing the peace offences in 2005, 84% (735) were adults and 16% (138) were youths. Males represented 84% (735) of persons charged with disturbing the peace offences.

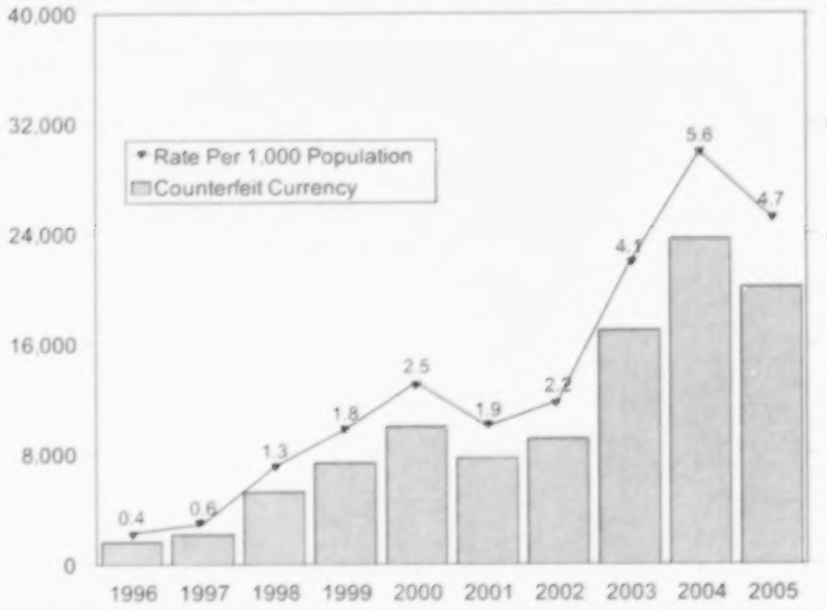
Counterfeit Currency

The number of reported counterfeit currency offences has increased substantially over the past decade, rising from a low of 1,632 offences reported in 1996 to a high of 23,578 offences in 2004. While an increase in counterfeiting activity has occurred in the province, the rise in these offences can also be partially attributed to an expansion of detection training and bank note security, as well as enhancements in police enforcement practices.

In 2005, a total of 20,124 counterfeit currency offences were reported, a decrease of 3,454 offences or 15% from the high reported in 2004. Counterfeit currency crimes accounted for 11% of all other crimes and 4% of total Criminal Code offences.

Expanded detection training and bank note security are partially responsible for the rise in counterfeit currency crimes.

Figure 31: Number and Rate of Counterfeit Currency Offences, 1996 to 200



In 2005, the rate of counterfeit currency offences per 1,000 population was 4.7, a decrease of 16% from the 2004 rate of 5.6 offences. Between 1994 and 1999, the counterfeit currency rate never exceeded 2 offences per 1,000 population. Over the past six years the counterfeit currency rate more than doubled.

Clearance rates are low for this type of offence. In 2005, 2% of counterfeit currency offences were cleared, the majority by charge.

Of the 159 persons charged with counterfeit currency offences in 2005, 67% (107) were male adults, 30% (47) were female adults, and the remaining 3% (5) were youths.

Criminal Harassment

In 1993, the Criminal Code was amended to include the offence of criminal harassment. Criminal harassment, more commonly known as stalking, prohibits harassing and intimidating conduct that causes a person to fear for his or her safety or the safety of anyone known to him or her.

Criminal harassment is a distinct form of criminal activity involving a series of actions as opposed to a single isolated event. When these actions are considered individually, they often do not constitute a crime (for example, sending notes or flowers). It is when these activities instill fear of injury that they represent a pattern of behaviour that is considered criminal.

In 2005, 4,388 criminal harassment offences were reported in B.C., a less than 1% increase from the 4,374 offences reported in 2004. Approximately 70% (2,930) of criminal harassment charges were cleared (solved) with 2,325 persons charged. Males represented almost 90% (2,034) of persons charged with criminal harassment offences.

Criminal harassment legislation prohibits harassing and intimidating conduct that causes a person to fear for his or her safety.

Criminal Harassment Survey Results

Police Services Division conducted a survey of criminal harassment incidents reported to police during 1995 and 1996. The survey revealed the following characteristics of a "typical" criminal harassment incident in B.C.:

- In eight out of ten incidents, the victim is female and the accused is male.
- Both the victim and the accused are likely between the ages of 25 and 45.
- In seven out of ten incidents, the harassment occurs at either the victim's home or the victim's place of work .
- In nearly half of the incidents there is an intimate relationship between the victim and the accused. In nine of ten incidents where an intimate relationship exists, the offender is an ex-boyfriend or an ex-spouse of the victim.
- About two-thirds of the incidents are cleared (solved). One-third of the incidents are cleared by charge while another third are cleared by other means.
- More than half of the accused charged with criminal harassment have prior criminal records. Of those accused persons with prior criminal records, half have a record for violent offences and one in four have a record for weapons offences.

Miscellaneous Other Criminal Code Offences

Those Criminal Code offences that do not have specific data collection codes are grouped in the category of "miscellaneous other" offences.

In 2005, there were 37,810 miscellaneous other Criminal Code offences reported, representing a 2% decrease from the 38,542 reported in 2004.

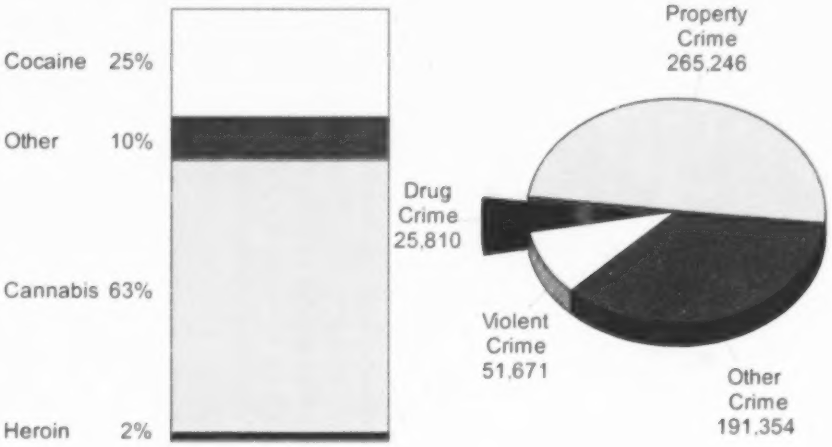
Approximately 38% (14,407) of miscellaneous other offences were cleared in 2005, 20% (7,390) were cleared by charge and 18% (7,017) were cleared by other means. A total of 6,111 persons were charged with these types of offences, with adults accounting for 94% (5,720) of persons charged.

Police Services Division conducted a survey of miscellaneous other offences in 1995 to determine the types of crimes that fall into this category. Results showed that 55% of the offences were uttering threats and 29% were harassing or indecent phone calls. Applications for peace bonds or restraining orders were the next largest category at 4%. The remaining 12% were various offences, including breach of peace, cruelty to animals, unlawfully in dwelling house, and possession of break-in instruments.

Over half of miscellaneous other Criminal Code offences are related to the uttering of threats.

Drug Crime in British Columbia

Figure 32: Drug Crime by Category, 2005.



Prior to 1997, offences involving drugs fell under two federal statutes: the Narcotic Control Act (NCA) and the Food and Drugs Act (FDA). The Narcotic Control Act dealt with illicit drugs and the Food and Drugs Act covered controlled and restricted drugs. On May 14, 1997, the NCA and Parts III and IV of the FDA were repealed and replaced by the Controlled Drugs and Substances Act (CDSA). This consolidation of drug control legislation allowed for the control of precursors (substances used to make psychoactive substances), and dealt with the forfeiture of property and goods related to illegal drug activities.

Before the proclamation of the CDSA, drug offences were reported on the basis of six drug categories: heroin, cocaine, cannabis, other drugs, controlled drugs and restricted drugs. Under the CDSA there are four categories of drug offences: heroin, cocaine, cannabis and other CDSA drugs. Generally speaking, the other CDSA drug category contains those drugs previously included in the other drugs and controlled and restricted categories. The consolidation of illicit drugs into the new categories provided by the CDSA did not commence until mid-1997. As such, 1997 was a transition year in the reporting of drug offences, and 1998 represents the first complete calendar year in the reporting of illicit drug offences under the CDSA.

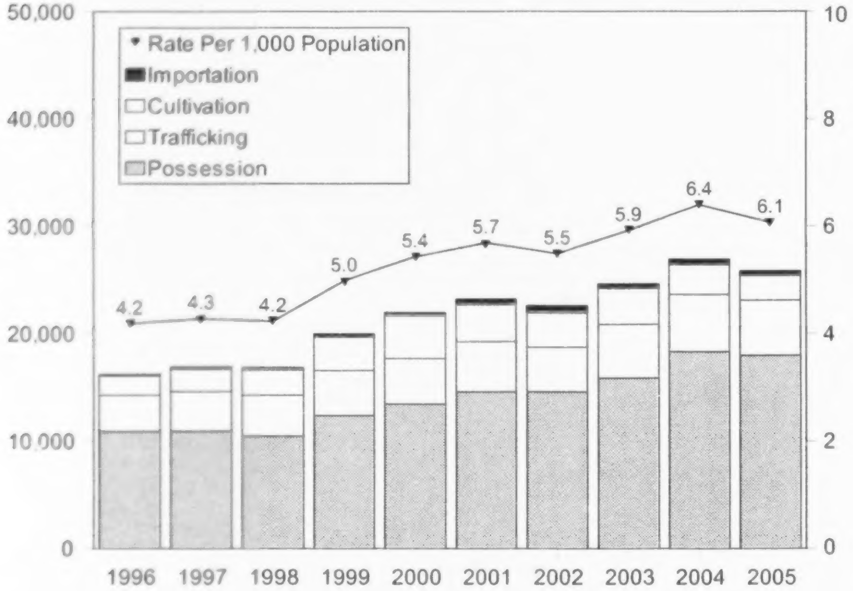
Drug Crime in 2005

The total number of drug crimes reported in 2005 was 25,810 offences, a decrease of 1,094 offences or 4% from the 26,904 reported in 2004. This represented a drug crime rate of 6.1 offences per 1,000 population. Over the past decade, the number of reported drug offences increased by over 60%, while the rate of drug crimes increased by 45%.

It is important to note that changes in drug offence data are highly sensitive to police enforcement practices. For example, decisions by policing organizations to investigate marijuana grow operations are likely to result in an increase in the number of reported cultivation offences.

Over the past decade, the number of reported drug offences has increased by over 60% while the drug crime rate has risen by 45%.

Figure 33: Number and Rate of Drug Crimes, 1996 to 2005.



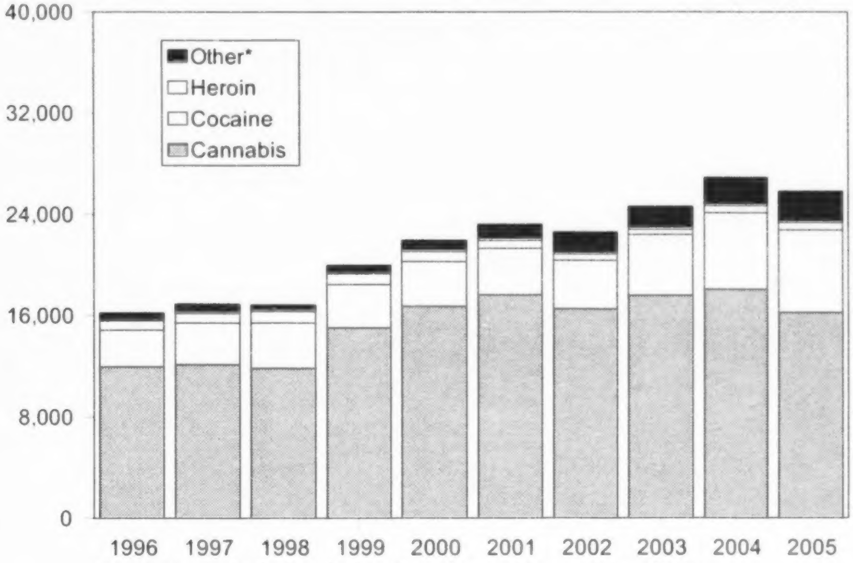
In 2005, 63% (16,237) of drug offences involved cannabis. A further 25% (6,515) involved cocaine. Of the remaining drug offences, 10% (2,472) involved other drugs and 2% (586) involved heroin (considered the most serious drug offence).

Drug crimes include the offences of possession, trafficking, importation and cultivation. In 2005, possession offences represented 70% (17,981) of all drug offences, while 20% (5,105) were for trafficking, 9% (2,302) for cultivation and 2% (410) for importation. These proportions have remained relatively stable during the past decade.

In 2005, 69% (17,733) of drug offences were cleared. Over the last ten years the percentage of drug offences cleared has gradually declined, from 80% in 1996 to 69% in 2005, an overall decrease of 14%. Of all drug offences, 22% (5,721) were cleared by charge in 2005 and 47% (12,012) were cleared by other means. Since the early 1990s, the proportion of incidents cleared by charge has decreased, while the proportion of incidents cleared by other means has increased.

The number of drug offences cleared by charge is relatively low considering the nature of the crime. Lack of verification of ownership of seized or found drugs is the major contributing factor to low charge rates.

Figure 34: Drug Crimes by Type of Drug, 1996 to 2005.



**From 1996 to 1997 Other Includes Other Drugs, Restricted Drugs and Controlled Drugs*

Of the 8,175 people charged with drug offences in 2005, 50% (4,084) were charged with trafficking offences, 40% (3,213) were charged with possession offences, 10% (823) with cultivation offences and less than 1% (55) were charged with importation offences.

Drug offence data are sensitive to police enforcement practices.

In 2005, adults accounted for 94% (7,706) of persons charged with drug offences while youths accounted for 6% (469). Males represented 81% (6,604) of persons charged while the remaining 19% (1,517) were females.

Cannabis

Cannabis includes hashish or marijuana in either powdered, leaf, liquid or resin form. Offences involving cannabis represented approximately two-thirds of all drug offences in 2005, and have comprised most drug offences in B.C. over the past decade.

In 2005, there were 16,237 cannabis offences reported, a 10% decrease from the 18,079 offences reported in 2004. Between 1996 and 2005, the number of cannabis offences increased by 36%. In 2005, the rate of cannabis offences was 3.8 offences per 1,000 population.

In 2005, possession represented 75% (12,225) of cannabis offences, cultivation represented 14% (2,302) while trafficking (1,621) and importation (89) represented 10% and less than 1% respectively.

Although the proportion of possession and importation offences has remained relatively stable in the last ten years, the proportion of trafficking and cultivation offences has fluctuated. Trafficking offences accounted for a high of 12% of all cannabis offences in 2001, and a low of 9% in 1998. Cultivation offences accounted for a low of 14% of cannabis offences in 2004 and a high of almost 23% in 2000.

In 2005, 68% (10,978) of cannabis offences were cleared, 14% (2,145) by charge and 54% (8,833) by other means.

Of the 3,732 persons charged with cannabis offences in 2005, 47% (1,754) were charged with possession offences, 34% (1,147) were charged with trafficking offences, 22% (823) with cultivation offences and less than 1% (8) with importation offences. Adults accounted for 91% (3,408) of persons charged while males accounted for 83% (3,091) of persons charged.

Cocaine

In 2005, 63% of drug offences involved cannabis.

The number of cocaine offences reported has increased 125% since 1996. In 2005, 6,515 offences were reported, an 8% increase from the 6,048 offences reported in 2004. Between 1996 and 2002, the rate of cocaine offences never exceeded 1 offence per 1,000 population. Since 2002, the rate of cocaine offences increased 66% to 1.5 offences per 1,000 population in 2005.

In 2005, possession represented 57% (3,727), trafficking accounted for 42% (2,750) and importation accounted for less than 1% (38) of all cocaine offences.

In 2005, 72% (4,712) of cocaine offences were cleared, 42% (2,707) by charge, and 30% (2,005) by other means.

Of the 3,412 persons charged with cocaine offences in 2005, 70% (2,377) were charged with trafficking offences, 30% (1,026) with possession offences and less than 1% (9) with importation offences. Adults accounted for 98% (3,331) of persons charged, and males accounted for 78% (2,674).

Heroin

In the late 1980s, the number of heroin offences was relatively stable at approximately 280 offences each year. Between 1992 and 1994, the number of heroin offences almost doubled, reaching a high of 925 offences in 1994. In the past ten years, however, the number of heroin offences fluctuated, ranging from a high of 894 in 1998 to a low of 417 offences in 2003, averaging 683 offences per year. In 2005, there were 586 heroin offences reported, a 6% increase from the 553 reported in 2004.

In 2005, possession accounted for 66% (384), trafficking accounted for 32% (190), and importation accounted for the remaining 2% (12) of all heroin offences. In the past ten years, the rate of heroin offences has never exceeded one offence per 1,000 population.

In 2005, 77% (452) of heroin offences were cleared, 43% (245) by charge and 34% (198) by other means.

Of the 338 persons charged with heroin offences in 2005, 67% (227) were charged with trafficking offences, 32% (107) with possession offences, and 1% (4) with importation offences. Adults accounted for 99% (333) of persons charged, and 78% (265) were males.

Other CDSA Drugs

Prior to 1997, the "other drugs" category comprised all narcotics (with the exclusion of heroin, cocaine, and cannabis) described by the Narcotic Control Act, in addition to illicit drugs or substances described in Schedule F of the Food and Drugs Act. These included, for example, derivatives of the opium poppy (such as codeine, morphine and opium), antibiotics, anticoagulants, antidepressants and anabolic steroids. Beginning in mid-1997, however, the other drug category was renamed the "other CDSA drug" category and included the above noted substances along with many of the drugs previously included in the controlled and restricted drugs categories.

In 2005, there were 2,472 other drug offences reported, an 11% increase from the 2,224 reported in 2004. The number of offences in this category steadily increased over the last ten years, rising over 1000% from the 202 offences reported in 1996. Despite this increase, the rate of other drug offences has never exceeded one offence per 1,000 population.

In 2005, possession accounted for 67% (1,645), trafficking accounted for 22% (544) and importation accounted for 11% (283) of other CDSA drug offences.

In 2005, 64% (1,591) of other drug offences were cleared, 25% (615) by charge and 39% (976) by other means.

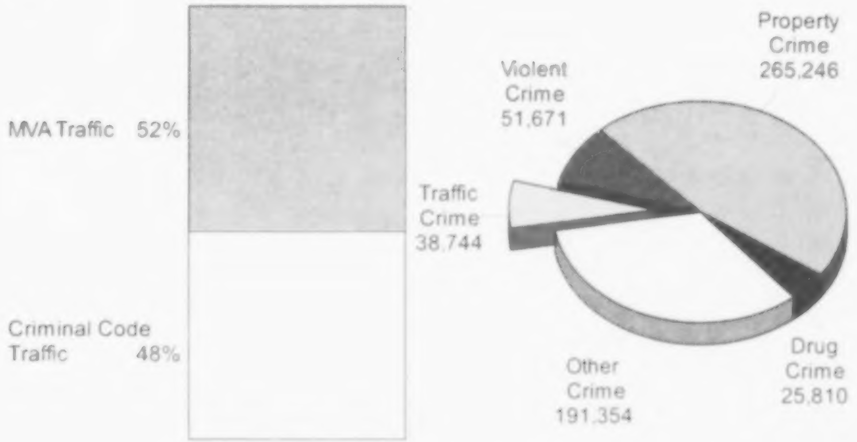
Of the 693 persons charged with other drug offences in 2005, 48% (333) were charged with trafficking offences, 47% (326) were charged with possession offences and 5% (34) were charged with importation offences. Adults accounted for 91% (634) of persons charged and 83% (574) were males.

In 2005, 67% of other CDSA drug offences were for possession. Importation and trafficking represented 11% and 22% respectively.

CHAPTER 6

Traffic Crime in British Columbia

Figure 35: Traffic Crime by Category, 2005.



In British Columbia, police report traffic offences under either the federal Criminal Code or the provincial Motor Vehicle Act. A total of 38,744 traffic offences were reported in 2005, 48% (18,500) were Criminal Code offences and the remaining 52% (20,244) were offences under the Motor Vehicle Act.

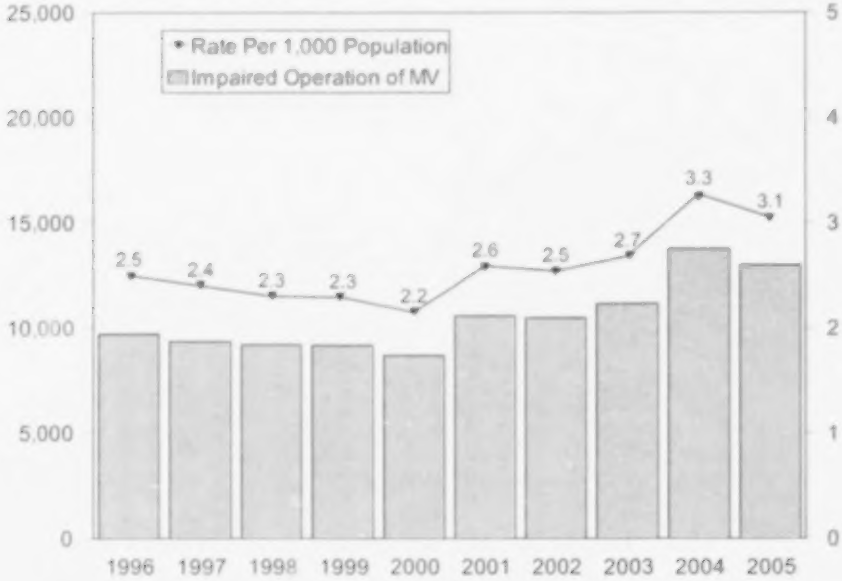
Criminal Code: Traffic

Criminal Code traffic offences are collected under the categories of impaired or dangerous operation of a vehicle (including motor vehicles, boats, vessels, and aircraft), failure to stop at the scene of an accident, driving a vehicle while prohibited from doing so, and failing or refusing to provide either a breath or blood sample upon demand by police.

In 2005, there were 18,500 Criminal Code traffic offences reported by the police, a 2% decrease from the 18,937 offences reported in 2004. From 1996 to 2000, the number of Criminal Code traffic offences reported by the police declined by 19% to a low of 12,827 offences reported in 2000. Since 2000, the number of Criminal Code traffic offences steadily increased, peaking with the 18,937 offences recorded in 2004.

Of the 18,500 Criminal Code traffic offences reported in 2005, 70% (12,982) were reported in the impaired operation of a motor vehicle category. Of these, 99% (12,872) were for impaired operation or driving with a blood alcohol level over .08 mg, while impaired operation causing bodily harm (87) and impaired operation causing death (23) accounted for the remaining 1%.

Figure 36: Number of Impaired Operation Offences, 1996 to 2005.



In 2005, offences relating to the impaired operation of a motor vehicle represented 70% of reported Criminal Code traffic offences.

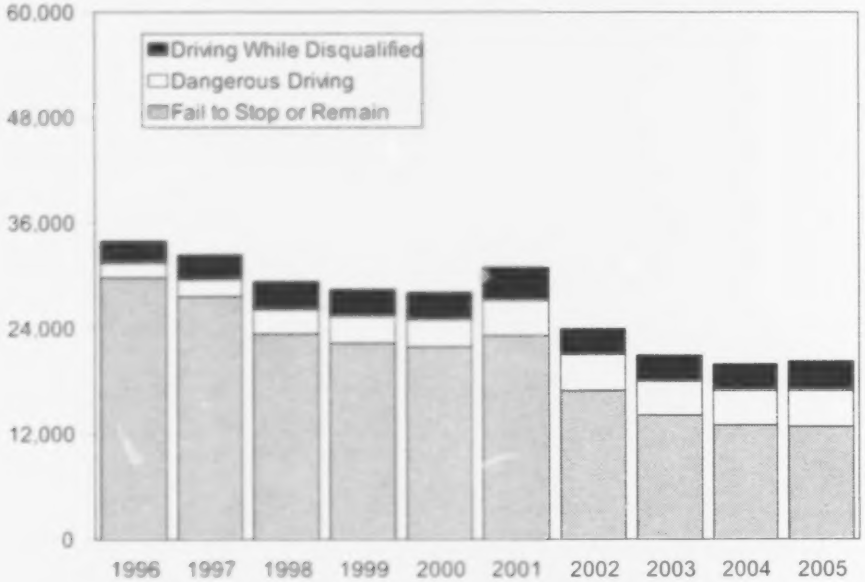
Although impaired operation of a vehicle has historically represented the greatest proportion of Criminal Code traffic offences, the frequency of this type of offence decreased approximately 13% over the past two decades. Increased police enforcement, anti-drinking and driving campaigns, societal pressure, and joint police and government safety initiatives are thought to have combined to reduce the number of these offences. However, it should be noted that while the number of reported Criminal Code impaired operation crimes declined, the number of administrative prohibitions (24-hour roadside suspensions) increased. One possible reason for the diverging trend is that a driving prohibition under provincial legislation can be issued on the belief by a peace officer that a person's ability to drive is impaired. In order to lay charges under the Criminal Code, on the other hand, clinically based evidence such as blood or breath samples is normally required.

Of the remaining 5,518 Criminal Code traffic offences reported in 2005, failure to stop or remain at an accident scene accounted for 10% (1,928) of total offences reported, dangerous operation of a motor vehicle accounted for 8% (1,403), driving a motor vehicle while prohibited accounted for 5% (845), failure to provide a breath or blood sample accounted for 4% (823), and combined, dangerous and impaired operation of a boat, vessel or aircraft accounted for 3% (519).

Provincial Statutes: Traffic

Under the UCR Survey, only three categories of traffic offences covered by the provincial Motor Vehicle Act are counted. These include the following: failure to stop or remain at the scene of an accident (hit and run), dangerous driving, and driving while suspended or prohibited.

Figure 37: Number of Provincial Statute Traffic Offences, 1996 to 2005



In 2005, there were 20,244 Motor Vehicle Act traffic offences reported, 307 or 1% more than in 2004. Of these offences, 63% (12,814) were for fail to stop or remain (hit and run), 20% (4,087) were for driving without due care (dangerous driving) and 17% (3,343) were for driving with a suspended or prohibited licence.

In 2005, there were 20,244 Motor Vehicle Act traffic offences, over 63% of these were for hit and run.

APPENDIX A-1 FOOTNOTES

[1] The 2005 population figure includes municipal and First Nations Reserve populations.

[2] Authorized police strengths and their associated costs have been adjusted to *exclude* secondments to other agencies (e.g. Justice Institute-B.C. Police Academy, CFSEU-BC), as reported to Police Services for calendar year 2005.

[3] Vancouver International Airport Authority (YVR) signed a supplemental agreement to Richmond's Municipal Police Unit Agreement in 1997. At that time, the City of Richmond assumed the administrative and financial functions for payment of enhanced RCMP policing services to the airport through Richmond RCMP detachment. The airport authority reimburses Richmond 100% of the cost for the YVR police. Police strength data for Richmond does not include Vancouver Airport positions.

[4] Total costs refer to actual and not authorized (or budgeted) costs in calendar year 2005, as reported by each municipality, to Police Services. For the municipalities policed by the RCMP, total costs include the municipality's share of RCMP contract costs, plus those costs borne 100% by the municipality which are over and above the contract costs, such as support staff and accommodation. If a municipality included the costs of bylaw enforcement or victim services programs in their actual expenditures, these have been excluded from total costs". Total costs also do not include capital expenditures, such as major construction projects, and they are also exclusive of any revenues. Note that some variation exists between jurisdictions with respect to the cost items that are included in their policing budgets.

[5] The Victoria and Esquimalt Police Departments were amalgamated in 2003. The 2005 total expenditure of $31,063,866 was allocated to Victoria ($26,839,180) and Esquimalt ($4,224,686) based on converted tax assessments. The combined population in 2005 was 94,525 (Victoria - 77,369, Esquimalt - 17,156).

APPENDIX A-1 DATA QUALIFIERS

1. Canada Census occurred in 2001. The population figures for 2005 contained in this report are estimates based on 2001 Census data. The population results from the 2001 Census determine which population category (5,000 to 15,000 or over 15,000 population) a municipality policed by the RCMP is in.
2. Population figures reflect the resident or late night population of a jurisdiction or municipality, rather than the number of people who spend some part of the day in the area either for business or pleasure purposes. Furthermore, populations do not take into account resident non-residents, i.e. cottage/chalet owners or students residing at universities or colleges whose permanent residence is within another jurisdiction.
3. Authorized police strength is based on the authorized police strength as of December 31, 2005. The authorized strength of the RCMP is obtained from RCMP "E" Division Headquarters. The authorized strength of the independent jurisdictions is collected annually from each department.
4. The offence data contained in this report have been recorded by the police on the Uniform Crime Reporting Survey (UCR). Offences are scored according to the UCR Scoring Rules. If a single criminal incident contains a number of violations of the law, then only the most serious one is recorded for UCR purposes. However, with the exception of robbery offences where one incident with multiple victims is scored as one offence, police record one offence for every victim of a violent crime, e.g. homicide, attempted murder, sexual and non-sexual assault, and abduction. Total CC Offences represents only those offences reported to, or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted; this data does not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained.
5. CCC Offences include Criminal Code-Property, Person and Other offences. Criminal Code-Property offences include break and enters, motor vehicle thefts, theft over and less than $5000, fraud, and possession of stolen property. Criminal Code-Person offences include violent crimes such as homicides, attempted murder, sexual and non sexual assaults, robbery and abduction. Criminal Code-Other offences include prostitution, gaming and betting, possession of offensive weapons, as well as arson, bail violations, disturb the peace, and mischief and property damage (vandalism). Criminal Code-Traffic offences are not included in Total CC offences.
6. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 2001 Canada Census. These figures reflect the resident population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are usually surrounded by unincorporated areas or other municipalities that have large residential populations. Core cities are also the business and

APPENDIX A-1 DATA QUALIFIERS CONTINUED

entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large part-time population relative to the resident population. Part-time residents include tourists, cottage or chalet owner, students and seasonal staff. If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

7. The case burden is defined as the number of Criminal Code offences (excluding traffic offences) per authorized police strength. Because it represents the workload per officer in each policing jurisdiction, the case burden is a better indicator of the demand for police services than either population or crime rate. The total number of Criminal Code offences in 2005, and the authorized police strength as of December 31, 2005, are used to calculate the case burden. Comparisons between the case burdens of independent municipal forces and RCMP municipal forces may be erroneous due to differences in the organizational structures of the RCMP and independent municipal forces. The RCMP municipal forces may have a relatively lower sworn strength because of the administrative support provided by "E" Division Headquarters.

8. Populations, crime rates and case burdens are only three of the many factors used to determine the strength and organization of a police force. A number of other factors, such as size, accessibility of the area to be policed, and traffic volume are also taken into consideration. Case burdens and crime rates also do not reflect the time spent by police providing general assistance to the public, or participating in crime prevention programs, or enforcing traffic laws.

Appendix A-2: Contribution to Policing by Level of Government, 2005

Type of Force	Police Strength	Population Policed	Total Police Costs Paid By:

APPENDIX A-2 FOOTNOTES

[1] Municipalities policed by the RCMP are categorized into two groups according to their population: 5,000 to 15,000 or over 15,000 population. Population figures shown are estimates based on the results of the 2001 Canada Census.

[2] Municipalities with a population of less than 5,000 do not make a direct contribution toward the provincial police services they receive. Rural property owners pay a rural property tax, but the amount raised from this tax does not make a significant contribution to policing.

[3] The First Nations Administered Police Services — Kitasoo-Xaixais and Stl'atl'imx — were opened in 1999. Two others, Tsewulton and Ditidaht, which also opened in 1999, were respectively closed in 2000 and 2004. Each of these police services are autonomous and independent of the RCMP. Their costs are shared jointly between the Federal (52%) and Provincial (48%) governments.

APPENDIX A-2 DATA QUALIFIERS

1. All expenditure figures shown above for the Federal and Provincial governments represent estimated costs paid in fiscal year 2005/2006. The expenditure figures for municipalities with independent and RCMP municipal forces represent actual costs paid by them in calendar year 2005. **Federal and provincial government contributions are preliminary, pending a final reconciliation of RCMP municipal and provincial force contract costs.**

2. Expenditure figures for the 59 municipalities with RCMP municipal forces include both the contract costs, and those costs paid by the municipality which are over and above the contract costs (for example, support staff salaries and benefits, and accommodation costs). These figures exclude Bylaw enforcement and victim services program costs where municipalities have this in their policing budget. The Federal government contributions to policing include their share of municipal and provincial policing costs. These figures only represent their share of the contract costs, and exclude costs borne by the Federal government which are over and above the contract costs. These figures also exclude the costs to Canada for Federal Force members operating in B.C. **Federal government contributions are preliminary, pending a final reconciliation of RCMP municipal and provincial contract costs.**

3. Canada Census occurred in 2001. The population figures for 2005 shown in this report are estimates based on 2001 Census data. Pending future Census results, populations in the 2001 Census currently determine which population category (5,000 to 15,000 or over 15,000 population) a municipality policed by the RCMP is in.

4. In 2005/2006, under RCMP Policing Agreements, municipalities over 15,000 population were paying 90% of their contract policing costs, and municipalities between 5,000 and 15,000 were paying 70% of their contract costs. In the same years the Province was paying 70% of provincial policing costs. For the First Nations Administered Police Services, the Province pays 48% and the Federal government pays 52% of the total policing costs.

APPENDIX A-3 FOOTNOTES

[1] In 2004 the strength of RCMP Division Administration increased by 7 positions in the training and network administration areas. In 2003 the strength of RCMP Division Administration decreased by 4 positions in the staffing and personnel areas. In 2002 the overall strength of RCMP Division Administration decreased by 14 positions. Nineteen Firearms Registration positions ended and 5 positions were added in planning, staffing and other administration. In 2001 the overall strength of RCMP Division Administration increased by 6 positions. One position was added for overall administration; 3 positions were added in Human Resources, Health Services and Staff Relations, and 2 were added in Informatics. In 2000 the overall strength of RCMP Division Administration increased by 5 positions. Three positions were added for the BC Policing Study, 1 position was added for firearms registration and 1 position was added to the Informatics Field Support section. In 1999 the overall strength of RCMP Division Administration increased by 3 positions including increases of 3 "Appropriate Officer Representative" positions in departmental administration, and 2 positions dedicated to firearms registration as well as a decrease of 2 fitness and lifestyle advisory positions. In 1998 the strength of RCMP Division Administration was increased by 18 positions: 16 firearms registration positions and 3 other administrative positions were added to departmental administration; 1 position was decreased in the staffing and personnel services area. In 1997 the strength of RCMP Division Administration was decreased by 8 positions in the areas of internal affairs, staffing and departmental administration. In 1996 the strength was decreased by 12 positions in the areas of information (informatics) and training services.

APPENDIX A-3 FOOTNOTES CONTINUED

[2] In 2004 a total of 19 positions were added to Federal Criminal Law authorized strength. These were new positions in the technical operational units assisting a wide variety of federal criminal investigations. In 2003 a total of 26 positions were added to Federal Criminal Law authorized strength: 6 positions were added for IBET (International Border Entry Integrity), 3 new positions for INSET (Integrated National Security Enforcement Team), 3 new marine security positions, 12 new drug enforcement positions (Cannabis Grow Operations and Methamphetamine Labs), and 2 more positions were added for securities fraud investigations. In 2002 a total of 46 positions were added: 18 new positions were created for IBET and 26 new positions for INSET. In 2001 the strength of Federal Criminal Law increased by 17 positions: 8 positions were added in Customs and Excise; 3 positions were added for outlaw motorcycle gang investigations; and 6 positions were added for money laundering enforcement. In 1999 the strength of Federal Criminal Law increased by 22 positions: 11 positions were added to "E" Division's criminal analysis section, 3 positions were added in federal protection intelligence support, 5 positions were added in the Vancouver criminal intelligence section, and 3 positions were added in district cirminal intelligence and proceeds of crime. In 1998 the strength of Federal Criminal Law decreased by 1 position in the area of foreign and domestic support. In 1997 the strength of Federal Criminal Law was increased by 7 positions in the areas of drug enforcement and awareness, and proceeds of crime enforcement. In 1996 the strength was decreased by 5 positions in the area of immigration and passport services.

[3] In 1997 responsibility for policing Vancouver International Airport was transferred from the RCMP Federal Force to Richmond Municipal detachment. As a result, the strength of International Airports was decreased by 65 positions. (Refer to Footnote 14)

[4] In 2005 the strength of Protective Policing increased by 32 positions for Protective Operations. These were new positions for Vancouver International Airport border and federal enforcement, air marshals and security checks. In 2004 the strength of Protective Policing decreased by 10 positions for Protective Operations. In 2003 the strength of Protective Policing increased by 9 positions for Protective Operations and technological crime. In 2002 the strength of Protective Policing increased by 48 positions. There were increases of 39 positions for Protective Operations, 6 positions in Technological Crime and another 3 positions in other security units. In 2000 the overall strength of Protective Policing decreased by six positions. Three positions in Security Systems Education and six in Departmental Security were lost; these nine positions were offset by an increase of three positions in the Explosives Disposal unit. In 1998 the strength of Protective Policing decreased by four positions assigned to departmental security and security systems education. In 1997 the strength of Protective Policing increased by two positions assigned to VIP services. In 1996 the strength of Protective Policing was decreased by three positions in the area of diplomatic protection services.

[5] Provincial Force Headquarters provides specialized policing services and functions at the provincial level, e.g. log theft unit, anti-tobacco smuggling unit, unsolved homicide unit, etc. In 2005 responsibility for Communications Centres and the 202 positions associated with them was transferred from the Districts to a Program Manager at Provincial Force Headquarters. Also in 2005, there were 136 new positions in operational support, major crime and other crime investigation units. In 2004 there was an increase of 25 positions to Provincial Force Headquarters. There were 6 new positions for illegal gaming enforcement; 6 new positions for major crime investigations; 13 other positions were assigned to other criminal investigations (e.g. commerical and technological crime.) In 2003 there was an increase of 25 positions: 6 positions for illegal gaming enforcement and another 6 for protective details were added. Several positions were also added in the areas of commercial crime and criminal investigation. In 1999, there was a decrease of 5 positions in the Security Frauds Investigations office. In 1998, there was an increase of 12 positions: 6 for the auto theft task force, 5 in operational support and 1 for Substance Abuse Education. In 1997, there was an increase of 5 positions including increases of 12 positions in Anti-Tobacco Smuggling, 2 Proceeds of Crime, 3 Criminal Intelligence and 6 Technical Services positions, and decreases of 4 Telecommunications and 14 Operational Support positions. In 1996 the strength of Provincial Force Headquarters increased by 38 positions: 12 of these were for the unsolved homicide squad, 4 were for Liquor Act enforcement, and most of the balance were for operational support.

[6] In 2005 responsibility for Communications Centres and the 202 positions associated with them was transferred from the Districts to a Program Manager at Provincial Force Headquarters. Also in 2005, the number of positions responsible for conducting general and major crime investigations at the District level was increased by 31 positions. In 2004 there was an increase of 58 positions to the strength of District Headquarters. There were 39 new positions in the Lower Mainland Integrated Homicide Investigation Team (IHIT); 9 new positions in information technology and communications; 5 new positions investigating major crimes; and 5 District Headquarters administrative positions. In 1997 the RCMP restructured its eight subdivisions into four districts known as Island, North, Southwest, and Southeast. Each District Headquarters provides specialized policing services and functions at the regional level, e.g. clerical/administrative services, communication centres, patrol vessels, and air services. In 1998, there was a decrease of 17 positions at District Headquarters including a decrease of 33 positions in District, Section and Co-ordinator operational support and increases of 7 investigation, 3 telecommunications, 4 substance abuse education and 2 other support positions. In 1997, there was an increase of 54 positions at District Headquarters including increases of 33 positions at Communications Centres, 20 positions in operational support due to district restructuring, and 4 positions in intelligence and other support services as well as a decrease of 3 positions in investigation and identification services at the District level. In 1996 there was aincrease of 5 positions assigned to subdivision Headquarters including increases of 4 positions in telecommunications, 2 in identification and 3 in dog squads and decreases of 1 position in operational support and 3 in marine services.

[7] Provincial Force Detachments provide policing services to municipalities under 5,000 population, as well as to the unincorporated areas of the Province. Provincial Force Detachments are usually named after a municipality; however, if a municipality is under 5,000 population the detachment polices not only the municipality but also the unincorporated or rural area surrounding it. If a municipality is over 5,000 population, the Provincial Force Detachment polices only the surrounding or unincorporated area. The specialized functions at Provincial Force Detachments include sworn members assigned to specialized police services at the community level, i.e. forensic identification, crime prevention, victim services, and police dogs. In 2005 there were 48 new positions in detachment policing, resulting from increased provincial government funding to this area. In 1996, as a result of changes in reporting responsibility, 25 positions assigned to community service (specialized) functions were transferrred from Provincial Force Detachments to District Headquarters.

[8] In 2005 the authorized strength for Traffic Enforcement increased by 76 positions assigned to Integrated Road Safety Units (IRSU) across the Province. In 2004 the authorized strength for Traffic Enforcement decreased by 38 positions as photo radar positions were redeployed. In 2003 the authorized strength for Traffic Enforcement decreased by 27 positions as photo radar positions were redeployed. In 1999 the strength for Traffic Enforcement was increased by 5 photo radar positions and decreased by 1 traffic services position at "E" Division. In 1998 the strength for Traffic Enforcement was increased by 2 photo radar positions. In 1997 there was an increase in the strength for Traffic Enforcement of 1

APPENDIX A-3 FOOTNOTES CONTINUED

position (decrease of 1 Highway Patrol and increase of 2 Traffic NCO/Analyst positions). In 1996 the strength for Traffic enforcement was increased by 42 Photo Radar and 2 Highway Patrol positions at detachments, but decreased by 10 Traffic NCO and Analyst positions and 4 Highway Patrol positions not reportable to detachments.

[9] In 1981 Canada Census indicated that seven municipalities — Coldstream, Fernie, North Saanich, Parksville, Pitt Meadows, Port Hardy, and Revelstoke — exceeded 5,000 population. The 1986 Canada Census indicated that the Municipality of Colwood was also over 5,000 population. Since their populations were officially over 5,000 persons, these municipalities pursuant to the Police Act and Municipal Act became responsible for their police services. Instead of contracting for RCMP Municipal police services, it was agreed that the Provincial Force would "extend" police services to these eight municipalities on a fee for service basis, and the municipalities would reimburse the Province for the Provincial Force police services they received. In 1992 seven of these municipalities contracted for RCMP Municipal police services; the eight municipality, Fernie, entered into an RCMP Municipal contract in 1994. In 1997 Fernie reverted to a provincial policing jurisdiction based on the 1996 Canada Census results which placed its population below 5,000 persons. In addition and based on the same Census results, five municipalities — Hope, Ladysmith, Lake Country, Spallumcheen, and Whistler — exceeded 5,000 population and as a result became responsible for their policing services. In 2002, based on the 2001 Canada Census results, Sooke exceeded 5,000 population and thus became responsible for its policing services while Port Hardy, with its population below 5,000 persons, reverted to a provincial policing jurisdiction.

[10] In British Columbia a municipality under the Police Act and Municipal Act becomes responsible for its police services when the Canada Census indicates its population exceeds 5,000 persons. In 2005, there were eleven "independent" police departments serving twelve municipalities and fifty-nine municipalities contracting with the RCMP for municipal police services.

[11] The RCMP First Nations Policing Program provides Aboriginal Community Constables (ACCP) and First Nations Community Policing Services (FNCPS) to various First Nations Communities. In 2005 there were 73 (28 ACCP and 45 FNCPS) authorized positions in BC. However, in early January 2006 the authorized strength for First Nations policing programs increased by 32 to 105 positions after several new agreements were signed.

[12] The First Nations Administered Police Services — Kitasoo-Xaixais and Stl'atl'imx — were opened in 1999. Two others, Tsewulton and Ditidaht, which also opened in 1999, were respectively closed in 2000 and 2004. Each of these police services are autonomous and independent of the RCMP.

[13] The Greater Vancouver Transportation Authority Police Service (GVTAPS) was formed as a transit security department in 2004, and was subsequently converted to a designated police unit under the Police Act in 2005.

[14] Vancouver International Airport Authority (YVR) signed a supplemental agreement to Richmond's Municipal Police Unit Agreement in 1997. At that time, the City of Richmond assumed the administrative and financial functions for payment of enhanced RCMP policing services to the airport through Richmond RCMP detachment. The airport authority reimburses Richmond 100% of the cost for the YVR police. Police strength data for Richmond does not include Vancouver Airport positions.

APPENDIX A-3 DATA QUALIFIERS

1. The police strength of the RCMP is obtained from the HRMIS/PARADE Reports, and is based on the authorized strength as of December 31st of each calendar year. Authorized strength includes all sworn members and sworn civilian members. Police strength for the RCMP forces does not include non-sworn civilian support staff, bylaw enforcement officers, or RCMP Auxiliary Police.
2. The police strength of the Independent Municipal Forces is submitted annually to Police Services, and is based on the authorized strength as of December 31st of each calendar year. Police strength for the Independent Forces does not include non-sworn civilian support staff, bylaw enforcement officers or reserve police officers.

APPENDIX A-4 AND A-5 FOOTNOTES

[1] The following policing jurisdictions have been opened or closed subsequent to Canada Census results or departmental amalgamations. Where jurisdictions have been amalgamated, the data shown reflect the total reporting for both the present jurisdiction and the absorbed jurisdiction up to and including the year in which the jurisdictions were amalgamated.

- In 1997, Field RCMP Provincial detachment was closed with Golden RCMP Provincial detachment assuming policing responsibilities for the area. In addition, five RCMP municipal detachments were opened subsequent to the 1996 Canada Census which showed their populations to be more than 5,000 persons. The detachments are Spallumcheen, Lake Country, Hope, Whistler and Ladysmith.
- In 1999, Radium Hot Springs Provincial detachment was closed with Columbia Valley RCMP Provincial detachment assuming policing responsibilities for the area.
- In 2000, as a result of Fort St. James RCMP Provincial detachment being restructured, Takla Landing RCMP Provincial detachment was opened.
- In 2002, two amalgamations occurred: Rossland, Fruitvale and Trail RCMP Provincial detachments were amalgamated as Trail and Greater District RCMP Provincial detachment; and Tahsis and Gold River RCMP Provincial detachments were amalgamated as Nootka Sound RCMP Provincial detachment. In addition, one RCMP Municipal detachment was opened and one was closed as a result of the 2001 Canada Census: Sooke RCMP Municipal detachment with a population of more than 5,000 persons was opened while Port Hardy RCMP Municipal detachment with a population of less than 5,000 persons was closed.
- In 2003, one restructure and four amalgamations occurred: Fernie, Sparwood and Elkford RCMP Provincial detachments were restructured as Elk Valley RCMP Provincial detachment; Sechelt and Gibsons RCMP Provincial detachments were amalgamated as Sunshine Coast RCMP Provincial detachment; Grand Forks and Midway RCMP Provincial detachments were amalgamated as Boundary RCMP Provincial detachment; Keremeos, Oliver and Osoyoos RCMP Provincial detachments were amalgamated as South Okanagan RCMP Provincial detachment; and the Esquimalt Police Department (Independent Municipal Force) was amalgamated into the Victoria Police Department.
- In 2004, Ditidaht FNAPS was closed with Lake Cowichan RCMP Provincial detachment assuming policing responsibilities for the area.

[2] CCC offences data include estimates for the municipalities of West Vancouver, and Abbotsford as well as the jurisdictions covered by the "Capital Region PRIME-BC Sign-on". For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for West Vancouver cover the reporting months of February and March 2005 while the estimates for Abbotsford cover the reporting period of February to April 2005. The estimates for the jurisdictions covered by the "Capital Region PRIME-BC Sign-on" were applied in the following manner: estimates for Langford Mun, Sooke Mun and Prov, View Royal Mun and Colwood Mun cover the reporting period of March to October 2005; estimates for West Shore Prov cover the reporting period of March to December 2005; estimates for North Saanich Mun, Sidney Mun and Prov cover the reporting period of April to August 2005; while estimates for Outer Gulf Islands Prov and Saltspring Island Prov cover the reporting period of April to October 2005. The estimates are based on each Department's 2004 reporting under the UCR Survey.

APPENDIX A-4 AND A-5 FOOTNOTES CONTINUED

[3] Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within these parks. As a result, crime rates for these jurisdictions have not been calculated.

[4] Population figures also include First Nations Reserve populations.

[5] The First Nations Administered Police Services — Kitasoo-Xaixais and Stl'atl'imx — were opened in 1999. Two others, Tsewulton and Ditidaht, which also opened in 1999, were respectively closed in 2000 and 2004. Each of these police services are autonomous and independent of the RCMP.

[6] The Policing Jurisdictions CCC offences Total does not include reporting by Canadian Pacific Railway Police, Canadian National Railway Police and other specialized units.

[7] Vancouver International Airport Authority (YVR) signed a supplemental agreement to Richmond's Municipal Police Unit Agreement in 1997. At that time, the City of Richmond assumed the administrative and financial functions for payment of enhanced RCMP policing services to the airport through Richmond RCMP detachment. The airport authority reimburses Richmond 100% of the cost for the YVR police. Police strength data for Richmond does not include Vancouver Airport positions.

APPENDIX A-4 AND A-5 DATA QUALIFIERS

1. The Provincial Force provides policing services to municipalities under 5,000 population, as well as to the unincorporated areas of the province. If a municipality is under 5,000 population, the Provincial Force polices not only the municipality but also the unincorporated or rural area surrounding it. If a municipality is over 5,000 population, the Provincial Force polices only the surrounding unincorporated area.

2. The police strength for municipal force jurisdictions (Mun) represents the number of sworn members assigned to a detachment or municipal department but does not include civilian members, support staff and bylaw enforcement officers. The police strength for provincial force jurisdictions (Prov) represents the number of police assigned to general duty and general investigation functions but does not include police assigned to specialized functions such as highway patrol or forensic identification.

3. The offence data contained in Appendix A5 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

4. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 2001 Canada Census. These figures reflect the resident population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are usually surrounded by unincorporated areas or other municipalities that have large residential populations. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large part-time population relative to the resident population. Part-time residents include tourists, cottage or chalet owner, students and seasonal staff. If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

5. The case burden is defined as the number of Criminal Code offences (excluding traffic offences) per authorized police strength. Because it represents the workload per officer in each policing jurisdiction, the case burden is a better indicator of the demand for police services than either population or crime rate. In Appendix A5, the total number of Criminal Code offences in 2005, and the authorized police strength as of December 31, 2005, are used to calculate the case burden. Comparisons between the case burdens of independent municipal forces and RCMP municipal forces may be erroneous due to differences in the organizational structures of the RCMP and independent municipal forces. The RCMP municipal forces may have a relatively lower sworn strength because of the administrative support provided by "E" Division Headquarters.

6. Case burden, crime rate and population are only three of the many factors used to determine the strength and organization of a police force. A number of other factors, such as size, accessibility of the area to be policed and traffic volume are also take into consideration. Case burden and crime rate also do not reflect the amount of time spent by police providing general assistance to the public, participating in crime prevention programs, or enforcing traffic laws.

Footnotes and Data Qualifiers for this report appear on page 112

APPENDIX B FOOTNOTES

[1] The offence data shown include estimates for the municipalities of West Vancouver, and Abbotsford as well as the jurisdictions covered by the "Capital Region PRIME-BC Sign-on". For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for West Vancouver cover the reporting months of February and March 2005 while the estimates for Abbotsford cover the reporting period of February to April 2005. The estimates for the jurisdictions covered by the "Capital Region PRIME-BC Sign-on" were applied in the following manner: estimates for Langford Mun, Sooke Mun and Prov, View Royal Mun and Colwood Mun cover the reporting period of March to October 2005; estimates for West Shore Prov cover the reporting period of March to December 2005; estimates for North Saanich Mun, Sidney Mun and Prov cover the reporting period of April to August 2005; while estimates for Outer Gulf Islands Prov and Saltspring Island Prov cover the reporting period of April to October 2005. The estimates are based on each Department's 2004 reporting under the UCR Survey.

[2] Population figures also include First Nations Reserve populations.

[3] Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within these parks. As a result, crime rates for these jurisdictions have not been calculated.

[4] The First Nations Administered Police Services — Kitasoo-Xaixais, and Stl'atl'imx — were opened in 1999. Each of these police services is autonomous and independent of the RCMP.

APPENDIX B DATA QUALIFIERS

1. The offence data contained in Appendix B have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

2. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 2001 Canada Census. These figures reflect the "resident" population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are usually surrounded by unincorporated areas or other municipalities that have large residential populations. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, cottage or chalet owners, students and seasonal staff. If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

3. The police strength for municipal force jurisdictions (Mun) represents the number of sworn members assigned to a detachment or municipal department but does not include civilian members, support staff and bylaw enforcement officers. The police strength for provincial force jurisdictions (Prov) represents the number of police assigned to general duty and general investigation functions but does not include police assigned to specialized functions such as highway patrol or forensic identification.

4. The British Columbia total includes additional reporting from Canadian National Railway Police, Canadian Pacific Railway Police and other specialized units.

Footnotes and Data Qualifiers for this report appear on page 145

APPENDIX C FOOTNOTES

[1] The following years contain crime data estimates.

- In 2001, the data include estimates for the Cities of Vancouver and Port Moody. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Vancouver cover the reporting period of February to April 2001 and are based on the Department's 2000 reporting under the UCR Incident-Based Survey. The estimates for Port Moody cover the reporting period of March to April 2001 and are based on the Department's 2000 reporting under the UCR Survey.
- In 2003, the data include estimates for the Cities of Victoria and Richmond. The estimates for Victoria cover the reporting month of December 2003, while the estimates for Richmond cover the reporting months of May and July 2003. The estimates are based on each Department's 2002 reporting under the UCR Survey.
- In 2004, the data include estimates for the jurisdictions covered by the "West Kootenay's PRIME-BC Sign-on". These include Nakusp Prov, Castlegar Mun and Prov, Kaslo Prov, Trail Mun and Trail & Greater District Prov, Boundary Prov, Nelson Prov, Slocan Lake Prov and Salmo Prov. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Nakusp Prov, Castlegar Prov and Kaslo Prov cover the reporting period of April to December 2004 while estimates for the remaining jurisdictions cover the reporting period of May to December 2004. The estimates are based on each Department's 2003 reporting under the UCR Survey.
- In 2005, the data include estimates for the municipalities of West Vancouver, and Abbotsford as well as the jurisdictions covered by the "Capital Region PRIME-BC Sign-on". For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for West Vancouver cover the reporting months of February and March 2005 while the estimates for Abbotsford cover the reporting period of February to April 2005. The estimates for the jurisdictions covered by the "Capital Region PRIME-BC Sign-on" were applied in the following manner: estimates for Langford Mun, Sooke Mun and Prov, View Royal Mun and Colwood Mun cover the reporting period of March to October 2005; estimates for West Shore Prov cover the reporting period of March to December 2005; estimates for North Saanich Mun, Sidney Mun and Prov cover the reporting period of April to August 2005; while estimates for Outer Gulf Islands Prov and Saltspring Island Prov cover the reporting period of April to October 2005. The estimates are based on each Department's 2004 reporting under the UCR Survey.

[2] Theft offences are classified according to the value of the goods stolen. Theft offences are divided into over and under $5,000 categories. The data shown are the total of these categories.

[3] The incidence of prostitution offences is highly sensitive to changes in police enforcement practices and it is this factor that largely contributes to any increase or decrease in these offences.

[4] In 1999, RCMP Commercial Crime Sections incorrectly reported counterfeit currency offences. As a result, estimates of RCMP Commercial Crime counterfeit currency data for this reporting period are included in the figures shown.

[5] Mischief and property damage offences are classified according to the value of damage done to property. Mischief and property damage offences are divided into over and under $5,000 categories. The data shown are the total of these categories.

[6] OCC: Other offences include Criminal Code offences not covered by a specific UCR offence category (e.g., breach of probation, extortion, computer/data mischief, uttering threats, criminal harassment, etc.).

[7] In June 1997, the Controlled Drugs and Substances Act (CDSA) came into effect. The CDSA consolidates the Narcotic Control Act (NCA) and Parts III and IV, and Schedules F, G, and H of the Food and Drugs Act (FDA). Prior to the proclamation of the CDSA, drug offences were reported on the basis of six drug categories: heroin, cocaine, cannabis, other drugs, controlled drugs and restricted drugs. Under the CDSA there are now four categories of drug offences: heroin, cocaine, cannabis and other CDSA drugs. Generally speaking, the other CDSA drug category contains those drugs previously included in the controlled, restricted, and other drug categories. The consolidation of illicit drugs into the new categories provided by the CDSA did not commence until mid-1997. As such, 1997 is a transition year in the reporting of drug offences. The 1997 data contain approximately half a year of data reported under the drug categories provided by the NCA/FDA and half a year of reporting under the new CDSA drug categories. Consequently, data anomalies are apparent in the other drug, controlled drug and restricted drug categories.

[8] In December 1998, the Firearms Act came into effect. As a result, a new federal statute offence category called the Firearms Act was added to the UCR Survey. This category covered all non Criminal Code weapons offences reported under the new legislation. As a result of the new legislation, the descriptions and contents of the UCR offence categories relating to Criminal Code weapons offences were changed. In 1999 offensive weapons data have been collected under the new categories of firearms usage, weapons possession and trafficking, and other weapons offences.

[9] The incidence of offences under federal statutes (excluding drugs) and provincial statutes (excluding traffic) is highly sensitive to changes in police enforcement practices and it is this factor that largely contributes to any increase or decrease in these offences.

[10] The following years contain traffic data estimates.

- In 2001, the data include estimates for the Cities of Vancouver and Port Moody. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Vancouver cover the reporting period of February to April 2001 and are based on the Vancouver Police Department's 2000 reporting under the UCR Incident-Based Survey. The estimates for Port Moody cover the reporting period of March to April 2001 and are based on the Port Moody Police Department's 2000 reporting under the UCR Survey.
- In 2003, the data include estimates for the Cities of Victoria and Richmond. The estimates for Victoria cover the reporting month of December 2003, while the estimates for Richmond cover the reporting months of May and July 2003. The estimates are based on each Department's 2002 reporting under the UCR Survey.
- In 2004, the data include estimates for the jurisdictions covered by the "West Kootenay's PRIME Sign-on". These include Nakusp Prov, Castlegar Mun and Prov, Kaslo Prov, Trail Mun and Trail & Greater District Prov, Boundary Prov, Nelson Prov, Slocan Lake Prov and Salmo Prov. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Nakusp Prov, Castlegar Prov and Kaslo Prov cover the reporting period of April to December 2004 while estimates for the remaining jurisdictions cover the reporting period of May to December 2004. The estimates are based on each Department's 2003 reporting under the UCR Survey.

APPENDIX C FOOTNOTES CONTINUED

* In 2005, the data include estimates for the municipalities of West Vancouver, and Abbotsford as well as the jurisdictions covered by the "Capital Region PRIME-BC Sign-on". For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for West Vancouver cover the reporting months of February and March 2005 while the estimates for Abbotsford cover the reporting period of February to April 2005. The estimates for the jurisdictions covered by the "Capital Region PRIME-BC Sign-on" were applied in the following manner: estimates for Langford Mun, Sooke Mun and Prov, View Royal Mun and Colwood Mun cover the reporting period of March to October 2005; estimates for West Shore Prov cover the reporting period of March to December 2005; estimates for North Saanich Mun, Sidney Mun and Prov cover the reporting period of April to August 2005; while estimates for Outer Gulf Islands Prov and Saltspring Island Prov cover the reporting period of April to October 2005. The estimates are based on each Department's 2004 reporting under the UCR Survey.

** In 2004, the Vancouver Police Department revised its reporting procedures relating to incidents of impaired operation. As a result of those revisions, the department now reports not only those incidents resulting in charges, but also those incidents cleared by other means through the issuance of roadside suspensions. This situation resulted in almost 2,000 additional impaired operation offences being reported in 2004.

APPENDIX C DATA QUALIFIERS

1. The offence, clearance, and persons charged data contained in Appendices C1 to C7 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

2. The offence data contained in Appendix C8 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey traffic scoring rules. If a single criminal traffic incident contains a number of violations of the law, only the most serious one is recorded for UCR purposes (MSO Rule). The only exception to the MSO Rule is in incidents where an offender is charged with impaired operation and failure to provide either a breath or blood sample. In this situation both offences would be scored and cleared by charge, but only the more serious offence of impaired operation would reflect persons charged data.

3. The number of traffic offences represents only those traffic offences reported to or discovered by police which, upon preliminary investigation, have been deemed to have occurred or been attempted. These data do not represent or imply a count of the number of charges laid, prosecutions conducted, informations sworn or convictions obtained. Parking violations or those traffic violations normally dealt with through ticket procedures, i.e., violation tickets (VTs), are not included in any of the offence categories contained in Appendix C8.

4. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are estimates based on the results of the 2001 Canada Census.

5. The number of offences cleared represents the number of offences solved by the police. Offences are cleared by charge when the police file a Report to Crown counsel (RCC) recommending charges. This does not necessarily imply the swearing of an information or prosecution as Crown may return the case to police due to insufficient evidence or take no further action. Offences are cleared otherwise when the police have identified an offender and have enough evidence to support a charge, but do not recommend charges. Offences are cleared otherwise in specific situations, such as, the offender was under 12 years of age, the victim was uncooperative, the offender had diplomatic immunity, or the offender was previously sentenced for similar crimes. **It should be noted that in 2000, the RCMP implemented PIRS reporting changes governing the clearance of an offence by other means. These changes stipulated that records could no longer be validated and cleared by other means without police inputting a suspect's name and date of birth. As a result, from 2000 onward, the number and rate of offences cleared, and those cleared by other means has decreased.**

6. The clearance rate is defined as the number of offences solved by police as a percentage of the number of offences reported by police. Caution should be used in the interpretation of clearance rates because the number of offences reported and the number of offences cleared within the same calendar year are not necessarily linked. Offences may be cleared or considered solved many months or even years after they are reported to police. Consequently, within the same reporting year, it is possible that the number of cleared offences exceeds the actual number of offences, resulting in clearance rates of over 100%.

7. The number of persons charged represents the number of people for whom the police have filed a Report to Crown counsel (RCC) alleging responsibility for an offence. An RCC does not necessarily imply the swearing of an information, or the prosecution or conviction of an individual as the Crown may return the case to police due to insufficient evidence, take no further action, approve diversion or alternative measures, or in the case of young offenders (youths), issue a letter of caution. Under the provisions of the Young Offenders Act, a young offender is defined as any individual under 18 years and over 11 years of age.

Footnotes and Data Qualifiers for this report appear on page 190

APPENDIX D FOOTNOTES

[1] The following policing jurisdictions have been opened or closed subsequent to Canada Census results or departmental amalgamations. Where jurisdictions have been amalgamated, the data shown reflect the total reporting for both the present jurisdiction and the absorbed jurisdiction up to and including the year in which the jurisdictions were amalgamated.

- In 1997, Field RCMP Provincial detachment was closed with Golden RCMP Provincial detachment assuming policing responsibilities for the area. In addition, five RCMP municipal detachments were opened subsequent to the 1996 Canada Census which showed their populations to be more than 5,000 persons. The detachments are Spallumcheen, Lake Country, Hope, Whistler and Ladysmith.
- In 1999, Radium Hot Springs Provincial detachment was closed with Columbia Valley RCMP Provincial detachment assuming policing responsibilities for the area.
- In 2000, as a result of Fort St. James RCMP Provincial detachment being restructured, Takla Landing RCMP Provincial detachment was opened.
- In 2002, two amalgamations occurred: Rossland, Fruitvale and Trail RCMP Provincial detachments were amalgamated as Trail and Greater District RCMP Provincial detachment; and Tahsis and Gold River RCMP Provincial detachments were amalgamated as Nootka Sound RCMP Provincial detachment. In addition, one RCMP municipal detachment was opened and one was closed as a result of the 2001 Canada Census: Sooke RCMP Municipal detachment with a population of more than 5,000 persons was opened while Port Hardy RCMP Municipal detachment with a population of less than 5,000 persons was closed.
- In 2003, one restructure and four amalgamations occurred: Fernie, Sparwood and Elkford RCMP Provincial detachments were restructured as Elk Valley RCMP Provincial detachment; Sechelt and Gibsons RCMP Provincial detachments were amalgamated as Sunshine Coast RCMP Provincial detachment; Grand Forks and Midway RCMP Provincial detachments were amalgamated as Boundary RCMP Provincial detachment; Keremeos, Oliver and Osoyoos RCMP Provincial detachments were amalgamated as South Okanagan RCMP Provincial detachment; and the Esquimalt Police Department (Independent Municipal Force) was amalgamated into the Victoria Police Department.
- In 2004, Ditidaht FNAPS was closed with Lake Cowichan RCMP Provincial detachment assuming policing responsibilities for the area.

[2] The following years contain crime data estimates.

- In 2001, the data include estimates for the Cities of Vancouver and Port Moody. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Vancouver cover the reporting period of February to April 2001 and are based on the Department's 2000 reporting under the UCR Incident-Based Survey. The estimates for Port Moody cover the reporting period of March to April 2001 and are based on the Department's 2000 reporting under the UCR Survey.
- In 2003, the data include estimates for the Cities of Victoria and Richmond. The estimates for Victoria cover the reporting month of December 2003, while the estimates for Richmond cover the reporting months of May and July 2003. The estimates are based on each Department's 2002 reporting under the UCR Survey.
- In 2004, the data include estimates for the jurisdictions covered by the "West Kootenay's PRIME Sign-on". These include Nakusp Prov, Castlegar Mun and Prov, Kaslo Prov, Trail Mun and Trail & Greater District Prov, Boundary Prov, Nelson Prov, Slocan Lake Prov and Salmo Prov. For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for Nakusp Prov, Castlegar Prov and Kaslo Prov cover the reporting period of April to December 2004 while estimates for the remaining jurisdictions cover the reporting period of May to December 2004. The estimates are based on each Department's 2003 reporting under the UCR Survey.
- In 2005, the data include estimates for the municipalities of West Vancouver, and Abbotsford as well as the jurisdictions covered by the "Capital Region PRIME-BC Sign-on". For each jurisdiction, the estimates cover the phase-in period required for PRIME-BC. The estimates for West Vancouver cover the reporting months of February and March 2005 while the estimates for Abbotsford cover the reporting period of February to April 2005. The estimates for the jurisdictions covered by the "Capital Region PRIME-BC Sign-on" were applied in the following manner: estimates for Langford Mun, Sooke Mun and Prov, View Royal Mun and Colwood Mun cover the reporting period of March to October 2005; estimates for West Shore Prov cover the reporting period of March to December 2005; estimates for North Saanich Mun, Sidney Mun and Prov cover the reporting period of April to August 2005; while estimates for Outer Gulf Islands Prov and Saltspring Island Prov cover the reporting period of April to October 2005. The estimates are based on each Department's 2004 reporting under the UCR Survey.

[3] Provincial parks are located within the policing jurisdictions of North Vancouver Prov and Ridge Meadows Prov. The crime rates for both of these policing jurisdictions are inflated due to small residential populations and the relatively large amount of property crimes occurring within these parks. As a result, crime rates for these jurisdictions have not been calculated.

[4] Population figures also include First Nations Reserve populations.

[5] The First Nations Administered Police Services — Kitasoo-Xaixais, and Stl'atl'imx — were opened in 1999. As a result, 1999 was a transition year with full reporting beginning in 2000. In addition, two other FNAPS — Tsewulton and Ditidaht — which also opened in 1999, were respectively closed in 2000 and 2004. Each of these police services is autonomous and independent of the RCMP.

APPENDIX D DATA QUALIFIERS

1. The offence data contained in Appendices D1 to D13 have been recorded by the police according to the Uniform Crime Reporting (UCR) Survey crime scoring rules (see section "Overview of Crime Data Collection Procedures in British Columbia" in this report for a detailed explanation of these rules).

2. The crime rate is defined as the number of Criminal Code offences (excluding traffic offences) per 1,000 population. Population figures are based on the results of Canada Census, which is conducted every five years. Canada Census occurred in 1996 and 2001; population figures for intervening years are estimates based on Census data. These figures reflect the "resident" population of a jurisdiction and exclude commuters, students, tourists and other part-time residents. Municipal crime rates do not necessarily reflect the relative safety of one municipality over another. More often than not, a high crime rate indicates that a municipality is a core city or tourist destination. Core cities are also the business and entertainment centres for many people who reside outside, as well as inside, the municipality. Core cities may also have a large "part-time" population relative to the resident population. Part-time residents include tourists, cottage or chalet owners, students and seasonal staff. If core cities expanded their boundaries to include residential areas outside their borders, the crime rate for the combined populated area would be considerably lower than the municipality itself. Similarly, if tourist destinations included part-time residents in their population base, their crime rates would be substantially lower.

3. The number of sexual offences includes level 1 sexual assault (least amount of bodily harm), level 2 sexual assault (involving bodily harm/ weapon), level 3 sexual assault (aggravated), and other sexual offences including sexual interference, invitation to sexual touching, sexual exploitation and incest.

4. The number of assaults (non-sexual) includes level 1 assault (least amount of bodily harm), level 2 assault (involving bodily harm/weapon), level 3 assault (aggravated), unlawful bodily harm, shoot with intent, assault police, assault other officer and other assaults including poisoning and torture.

5. The number of break and enter offences includes break and enter (business premises), break and enter (residence), and other break and enter offences including breaking into trains, box-cars, unattached trailers and storage lockers.

6. The number of motor vehicle thefts includes thefts of automobiles, trucks, motorcycles, and other motor vehicles including motorized snow vehicles, and self-propelled farming and construction implements.

7. The number of thefts includes bicycle theft, theft from motor vehicle, shoplifting and other theft. Thefts are divided into over and under $5,000 categories.

8. The number of mischief and property damage offences (vandalism) includes mischief and property damage over $5,000, and mischief and property damage under $5,000.

9. The B.C. total includes additional reporting from Canadian National Railway Police, Canadian Pacific Railway Police and other specialized units.
